

- POLLUTION CONTROL GENERAL NOTES**
- The Erosion Control Plan, detailing and other details provided in the Construction General Notes and the Storm Water Pollution Prevention Plan (SWPPP) are to be used in conjunction with the Storm Water Pollution Prevention Act (SWPPA) to provide means to prevent or minimize pollution of storm water.
  - The construction activity included in this plan will include:
    - Final Grading
    - Final Site Preparation
    - Final Site Stabilization
    - Final Site Cleanup
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
  - The storm water runoff from the site is to be controlled by a storm sewer system and a drainage system.
