Request: Date Required: 3/27/2012  
Roof crickets

We have not been able to find the pitch of the roof top crickets. The pitch of the main roof is given as a 3/8 inch pitch. Not sure if you want the typical 1/4 inch per foot fall or do you want the crickets to have the same pitch (3/8) as the main roof. Please give us the pitch of the roof top crickets.

Requested by: Bryan Pickler  
Embrey Partners, Ltd.

Response:

We didn't give the slopes for every little cricket because that leans more towards 'Means and Methods.' A minimum of 3/8" per foot slope is acceptable for all crickets. If you need a detail for a certain part of the roof, I'll create that for you.
