

GENERAL NOTES

- Sanitary sewer pipe joints shall conform to current A.S.T.M. designation C-245 "Verified Clay Pipe Joints Using Materials Having Resilient Properties."
- All sanitary sewer laterals shall include 4" V.C.T. Wye, bend, pipe, and stopper installed at the mid-point of each lot, unless otherwise shown on plans.
- Unless otherwise noted, all material and construction shall conform to the standard specifications of the City of Addison, Texas. In the event an item is not covered in the City of Addison specifications, the City Engineer's decision shall apply.
- All water services shall be located 10.0 feet upstream of the sewer lateral, unless otherwise shown on plans.
- The location of all existing utilities to be verified by contractor prior to start of construction.
- Contractor to notify utility companies at least 48 hours prior to start of construction.
