NOTES:

- Contractor is responsible for contacting and having located all utilities that may be impacted by construction prior to construction.
- Contractor shall provide positive drainage throughout project area. No ponding or standing water is acceptable.
- Contractor shall notify the Landscape Architect of any discrepancies that may arise during the construction period. Failure to make such discrepancies known to the Landscape Architect will result in the contractor's liability to redo work as necessary to achieve the design intent.
- Contractor shall notify Landscape Architect 48 hours in advance of commencing work to coordinate project inspection schedule.
- All existing trees shall be protected against excessive backfill and/or compaction during construction.

DRAINAGE NOTES:

- All on site work, unless otherwise noted, shall conform to standard specifications. Work within the public r.o.w. shall conform with the Town of Addison construction specifications.
- The contractor is responsible for obtaining a r.o.w. permit and all other permits required to construct proposed improvements.
- The contractor is responsible for compliance with all federal, state and local regulations regarding trench safety.
- Barricading and traffic control while constructing in and along public r.o.w. shall be submitted and approved by the Town of Addison.
- Contractor shall verify location and elevation of existing utilities prior to the start of construction.
- Contractor shall verify location and elevation of proposed storm drain structures with landscape architect's grading plan.
