Re: Stanford Court - Photometric Study

Clay I am enclosing for you the completed study by my MEP engineer on the proposed lighting for Stanford Court.

I believe with this you should be able to release us to get our permits and begin the franchise utility installation but if there is another issue related to this please let me know so I can address that. I am really behind on this phase of the construction and Karen has these lights and the job on hold pending your review and approval.

Would you please either call me or leave a message on this issue or if it is more convenient you can e-mail me at bhaney@bhaneyconstruction.com.

Thanks for your help in clearing up this lighting issue.
