Washington, DC 20460

Notice of Termination (NOT) of Coverage Under the NPDES General Permit
for Storm Water Discharges Associated with Industrial Activity

Submission of this Notice of Termination constitutes notice that the party identified in Section II of this form is no longer authorized to discharge storm water associated with industrial activity under the NPDES program. ALL NECESSARY INFORMATION MUST BE PROVIDED ON THIS FORM.

I. Permit Information

NPDES Storm Water
General Permit Number:

TX.R.I.D.EW.5.5

Check Here if You are No Longer
the Operator of the Facility:

Check Here if the Storm Water
Discharge is Being Terminated:

II. Facility Operator Information

Name: T.O.W.N. O.F. A.D.D.I.S.O.N.

Phone: 9.72.4.50.287.9

Address: P.O. Box 9010

City: Addison

State: TX

ZIP Code: 75001-9010

III. Facility/Site Location Information

Name: Arapahoe Road Construction

Address: Arapahoe Road

City: Addison

State: TX

ZIP Code: 75001

Latitude: 32.5730 Longitude: 0.964930 Quarter: Section: Township: Range:

IV. Certification: I certify under penalty of law that all storm water discharges associated with industrial activity from the identified facility that are authorized by a NPDES general permit have been eliminated or that I am no longer the operator of the facility or construction site. I understand that by submitting this Notice of Termination, I am no longer authorized to discharge storm water associated with industrial activity under this general permit, and that discharging pollutants in storm water associated with industrial activity to waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by a NPDES permit. I also understand that the submittal of this Notice of Termination does not release an operator from liability for any violations of this permit or the Clean Water Act.

Instructions for Completing Notice of Termination (NOT) Form

Who May File a Notice of Termination (NOT) Form

Permittees who are presently covered under the EPA issued National Pollutant Discharge Elimination System (NPDES) General Permit for Storm Water Discharges Associated with Industrial Activity may submit a Notice of Termination (NOT) form when their facilities no longer have any storm water discharges associated with industrial activity as defined in the storm water regulations at 40 CFR 122.26 (b)(14), or when they are no longer the operator of the facilities.

For construction activities, elimination of all storm water discharges associated with industrial activity occurs when disturbed soils at the construction site have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time, or that all storm water discharges associated with industrial activity from the construction site that are authorized by a NPDES general permit have otherwise been eliminated. Final stabilization means that all soil-disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of 70% of the cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geotextiles) have been employed.

Where to File NOT Form

Send this form to the the following address:

Storm Water Notice of Termination
P.O. Box 1185
Newington, VA 22122

Completing the Form

Type or print, using upper-case letters, in the appropriate areas only. Please place each character between the marks. Abbreviate if necessary to stay within the number of characters allowed for each item. Use only one space for breaks between words, but not for punctuation marks unless they are needed to clarify your response. If you have any questions about this form, call the Storm Water Hotline at (703) 821-4823.

U.S. ENVIRONMENTAL PROTECTION AGENCY
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES)
STORM WATER CONSTRUCTION GENERAL PERMIT COVERAGE NOTICE

May 25, 1999

Dear Operator:

Your Notice of Intent (NOI) for the facility noted below has been processed by the U.S. Environmental Protection Agency. This facility is authorized to discharge storm water associated with construction activity under the terms and conditions imposed by EPA's NPDES storm water construction general permit issued for use in the state of Texas. Your facility's NPDES construction storm water general permit number is TXRR10EW55.

EPA's storm water construction general permit requires certain storm water pollution prevention and control measures. Among the conditions and requirements of this permit, you must prepare and implement a pollution prevention plan (PPP) that is tailored to your construction site. Enclosed is an insert explaining how you may obtain a summary guidance document designed to assist you in the development and implementation of your PPP. The summary is organized according to the phases of the pollution prevention planning process and contains a set of worksheets and an example of a pollution prevention plan. As a facility authorized to discharge under this storm water construction general permit, all terms and conditions must be complied with to maintain coverage and avoid possible penalties.

FACILITY:

Arapaho Road Construction
Arapaho Rd
Addison, TX 75001-9010
325730, 0964930,

OPERATOR:

Town Of Addison
PO Box 9010
Addison
TX 75001-9010

To obtain a copy of the construction general permit terms and conditions to which you are now held accountable, please call the EPA Office of Water Resource Center at (202)260-7786. If you have general questions concerning the storm water program, please call the EPA Region 06 contact: Brent Larsen, (214) 665-7523.

EPA
STORM WATER NOTICE OF INTENT
PROCESSING CENTER
401 M Street, S.W. (4203) Washington, DC 20460 301/495-4145

Dear Permittee:

Information on obtaining assistance for developing storm water pollution prevention plans for construction sites is provided below:

- A guidance manual entitled Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices, EPA-832-R-92-005, is available from the National Technical Information Service (NTIS) at a cost of \$38.50 plus handling fees. To order the complete guidance manual, contact NTIS at 1-800-553-6847 or e-mail at order@ntis.fedworld.gov and order document number PB 92-235951INZ.
 - The manual contains comprehensive guidance on the development of storm water pollution prevention plans and identification of appropriate best management practices for construction activities.

- A summary of the detailed guidance manual entitled Storm Water Management for Construction Activities: Developing Pollution Prevention Plans and Best Management Practices: Summary Guidance, EPA-833-R-92-001, can be ordered from the EPA Resource Center at no charge. To order the summary manual, contact the EPA Office of Water Resource Center at (202) 260-7786 and order document number EPA-833-R-92-001. The summary guidance manual is also available from the NTIS. Contact NTIS at 1-800-553-6847 or e-mail at order@ntis.fedworld.gov and order document number PB 93-223550INZ.
 - The summary is organized according to the phases of the pollution prevention planning process and includes a set of worksheets and an example of a pollution prevention plan.

- If you have questions concerning the storm water permitting program, you may contact your permitting authority at the appropriate state agency or EPA regional office.

James C Pierce Jr Asst Cty Eng
Town Of Addison
Po Box 9010
Addison, TX 75001-9010

Dear James C Pierce Jr Asst Cty Eng:

You recently submitted a Notice of Intent (NOI) form for coverage under the U.S. Environmental Protection Agency's storm water construction general permit for use in the State of Texas for the following facility:

Name: Araphao Road Construction
Address: Arapaho Rd
Addison, TX 75001-9010
Lat/Long: 325730/0964930
Quarter, Section: ; Township, Range:

You have not been granted permit coverage because the information on your NOI form was incomplete. Approximately 3 months ago a letter was sent to you indicating which information was missing from your original submission, and requesting that you correct the deficiencies. Since we did not receive a reply to this letter or the reply did not include all required information, you have not been granted permit coverage and are not authorized under the NPDES program to discharge storm water.

If you determine that you still need storm water permit coverage, please immediately submit a newly completed and signed NOI form to:

Storm Water Notice Of Intent (4203)
401 M Street SW
Washington, DC 20460

Contact the EPA NOI Center at (301) 495-4145 if you have questions about this letter. If you do not wish to seek coverage, no response to this letter is necessary. If you have questions regarding the types of activities covered by EPA's storm water construction general permit, please refer to the permit terms and conditions or call the EPA Region 06 contact: Brent Larsen, (214) 665-7523.

*Please see attached

Notice of Intent (NOI) for Storm Water Discharges Associated with
CONSTRUCTION ACTIVITY Under a NPDES General Permit

Submission of this Notice of Intent constitutes notice that the party identified in Section I of this form intends to be authorized by a NPDES permit issued for storm water discharges associated with construction activity in the State/Indian Country Land identified in Section II of this form. Submission of this Notice of Intent also constitutes notice that the party identified in Section I of this form meets the eligibility requirements in Part I.B. of the general permit (including those related to protection of endangered species determined through the procedures in Addendum A of the general permit), understands that continued authorization to discharge is contingent on maintaining permit eligibility, and that implementation of the Storm Water Pollution Prevention Plan required under Part IV of the general permit will begin at the time the permittee commences work on the construction project identified in Section II below. IN ORDER TO OBTAIN AUTHORIZATION, ALL INFORMATION REQUESTED MUST BE INCLUDED ON THIS FORM. SEE INSTRUCTIONS ON BACK OF FORM.

I. Owner/Operator (Applicant) Information

Name: TOWN OF Addison Phone: 972.450.2879
Address: PO Box 9010 Status of Owner/Operator: M
City: Addison State: TX Zip Code: 75001-9010

II. Project/Site Information

Project Name: Arapaho Road Construction Is the facility located on Indian Country Lands? Yes No
Project Address/Location: Arapaho Road
City: Addison State: TX Zip Code: 75001-9010
Latitude: 32.9730 Longitude: -96.4930 County: Quail

Has the Storm Water Pollution Prevention Plan (SWPPP) been prepared? Yes No

Optional: Address of location of SWPPP for viewing Address in Section I above Address in Section II above Other address (if known) below:

SWPPP Address: _____ Phone: _____

City: _____ State: _____ Zip Code: _____

Name of Receiving Water: White Rock Creek

05011998 07301999
Month Day Year Month Day Year

Estimated Construction Start Date Estimated Completion Date

Estimate of area to be disturbed (to nearest acre): 1.4

Estimate of Likelihood of Discharge (choose only one):

- 1. Unlikely
- 2. Once per month
- 3. Once per week
- 4. Once per day
- 5. Continual

Based on instruction provided in Addendum A of the permit, are there any listed endangered or threatened species, or designated critical habitat in the project area?

Yes No

I have satisfied permit eligibility with regard to protection of endangered species through the indicated section of Part I.B.3.e.(2) of the permit (check one or more boxes):

(a) (b) (c) (d)

III. Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. EPA Form 3510-9 replaced 3510-6 (8-98)

Instructions - EPA Form 3510-9

Form Approved. OMB No. 2040-0189

Notice of Intent (NOI) for Storm Water Discharges Associated with Construction Activity to be Covered Under a NPDES Permit
Who Must File a Notice of Intent Form

Under the provisions of the Clean Water Act, as amended, (33 U.S.C. 1251 et seq.; the Act), except as provided by Part I.B.3 the permit, Federal law prohibits discharges of pollutants in storm water from construction activities without a National Pollutant Discharge Elimination System Permit. Operator(s) of construction sites where 5 or more acres are disturbed, smaller sites that are part of a larger common plan of development or sale where there is a cumulative disturbance of at least 5 acres, or any site designated by the Director, must submit an NOI to obtain coverage under an NPDES Storm Water Construction General Permit. If you have questions about whether you need a permit under the NPDES Storm Water program, or if you need information as to whether a particular program is administered by EPA or a State agency, write to or telephone the Notice of Intent Processing Center at (703) 931-3230.

Where to File NOI Form

NOIs must be sent to the following address:

Storm Water Notice of Intent (4203)
USEPA
401 M. Street, SW
Washington, D.C. 20460

Do not send Storm Water Pollution Prevention Plans (SWPPPs) to the above address. For overnight/express delivery of NOIs, please include the room number 2104 Northeast Mall and phone number (202) 260-9541 in the address.

When to File

This form must be filed at least 48 hours before construction begins.

Completing the Form

OBTAIN AND READ A COPY OF THE APPROPRIATE EPA STORM WATER CONSTRUCTION GENERAL PERMIT FOR YOUR AREA. To complete this form, type or print, using uppercase letters, in the appropriate areas only. Please place each character between the marks (abbreviate if necessary to stay within the number of characters allowed for each item). Use one space for breaks between words, but not for punctuation marks unless they are needed to clarify your response. If you have any questions on this form, call the Notice of Intent Processing Center at (703) 931-3230.

Section I. Facility Owner/Operator (Applicant) Information

Provide the legal name, mailing address, and telephone number of the person, firm, public organization, or any other entity that meet either of the following two criteria: (1) they have operational control over construction plans and specifications, including the ability to make modifications to those plans and specifications; or (2) they have the day-to-day operational control of those activities at the project necessary to ensure compliance with SWPPP requirements or other permit conditions. Each person that meets either of these criteria must file this form. Do not use a colloquial name. Correspondence for the permit will be sent to this address.

Enter the appropriate letter to indicate the legal status of the owner/operator of the project: F = Federal; S = State; M = Public (other than federal or state); P = Private.

Section II. Project/Site Information

Enter the official or legal name and complete street address, including city, county, state, zip code, and phone number of the project or site. If it lacks a street address, indicate with a general statement the location of the site (e.g., Intersection of State Highways 61 and 34). Complete site information must be provided for permit coverage to be granted.

The applicant must also provide the latitude and longitude of the facility in degrees, minutes, and seconds to the nearest 15 seconds. The latitude and longitude of your facility can be located on USGS quadrangle maps. Quadrangle maps can be obtained by calling 1-800 USA MAPS. Longitude and latitude may also be obtained at the Census Bureau internet site: <http://www.census.gov/cgi-bin/gazetteer>.

Latitude and longitude for a facility in decimal form must be converted to degrees, minutes and seconds for proper entry on the NOI form. To convert decimal latitude or longitude to degrees, minutes, and seconds, follow the steps in the following example.

Convert decimal latitude 45.1234567 to degrees, minutes, and seconds.

- 1) The numbers to the left of the decimal point are degrees.
- 2) To obtain minutes, multiply the first four numbers to the right of the decimal point by 0.006. $1234 \times .006 = 7.404$.
- 3) The numbers to the left of the decimal point in the result obtained in step 2 are the minutes: 7.
- 4) To obtain seconds, multiply the remaining three numbers to the right of the decimal from the result in step 2 by 0.06: $404 \times 0.06 = 24.24$. Since the numbers to the right of the decimal point are not used, the result is 24".
- 5) The conversion for 45.1234 = 45° 7' 24".

Indicate whether the project is on Indian Country Lands.

Indicate if the Storm Water Pollution Prevention Plan (SWPPP) has been developed. Refer to Part IV of the general permit for information on SWPPPs. To be eligible for coverage, a SWPPP must have been prepared.

Optional: Provide the address and phone number where the SWPPP can be viewed if different from addresses previously given. Check appropriate box.

Enter the name of the closest water body which receives the project's construction storm water discharge.

Enter the estimated construction start and completion dates using four digits for the year (i.e. 05/27/1998).

Enter the estimated area to be disturbed including but not limited to: grubbing, excavation, grading, and utilities and infrastructure installation. Indicate to the nearest acre; if less than 1 acre, enter "1." Note: 1 acre = 43,560 sq. ft.

Indicate your best estimate of the likelihood of storm water discharges from the project. EPA recognizes that actual discharges may differ from this estimate due to unforeseen or chance circumstances.

Indicate if there are any listed endangered or threatened species, or designated critical habitat in the project area.

Indicate which Part of the permit that the applicant is eligible with regard to protection of endangered or threatened species, or designated critical habitat.

Section III. Certification

Federal Statutes provide for severe penalties for submitting false information on this application form. Federal regulations require this application to be signed as follows:

For a corporation: by a responsible corporate officer, which means: (i) president, secretary, treasurer, or vice president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

For a partnership or sole proprietorship: by a general partner of the proprietor, or

For a municipality, state, federal, or other public facility: by either a principal executive or ranking elected official. An unsigned or undated NOI form will not be granted permit coverage.

Paperwork Reduction Act Notice

Public reporting burden for this application is estimated to average 3.7 hours. This estimate includes time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding the burden estimate, any other aspect of the collection of information, or suggestions for improving this form, including any suggestions which may increase or reduce this burden to: Director, OPPE Regulatory Information Division (2137), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460. Include the OMB control number on any correspondence. Do not send the completed form to this address.

July 20, 1998

Mr. Robert D. Weber, Project Engineer
Ed Bell Construction
P.O. Box 540787
Dallas, TX 75354-0787

Re: Arapaho Road Storm Water – Notice of Intent (NOI)

Dear Mr. Weber:

EPA Region 6 has reissued the General Permit for Storm Water Discharge (the old one expired September, 1997) and accordingly, a revised NOI form must be submitted within 90 days of July 6, 1998 in order to obtain coverage under the new permit. Since you have previously submitted a NOI for permit coverage, you will not be required to fill in the endangered species portion of the NOI on the new form.

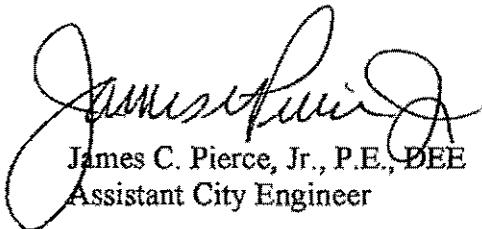

I have attached a copy of the NOI for your use along with some general information from EPA.

Please send me a copy of the NOI you submit.

Please call me at 972-450-2879 if you have any questions.

Very truly yours,

Town of Addison

James C. Pierce, Jr., P.E., DEE
Assistant City Engineer

cc: John Baumgartner, Director of Public Works

EPA Form 3510-9 replaced 3510-6 (8-98)

Instructions - EPA Form 3510-9

Form Approved. OMB No. 2040-0188

Notice of Intent (NOI) for Storm Water Discharges Associated with Construction Activity to be Covered Under a NPDES Permit
Who Must File a Notice of Intent Form

Under the provisions of the Clean Water Act, as amended, (33 U.S.C. 1251 et seq.; the Act), except as provided by Part I.B.3 the permit, Federal law prohibits discharges of pollutants in storm water from construction activities without a National Pollutant Discharge Elimination System Permit. Operator(s) of construction sites where 5 or more acres are disturbed, smaller sites that are part of a larger common plan of development or sale where there is a cumulative disturbance of at least 5 acres, or any site designated by the Director, must submit an NOI to obtain coverage under an NPDES Storm Water Construction General Permit. If you have questions about whether you need a permit under the NPDES Storm Water program, or if you need information as to whether a particular program is administered by EPA or a State agency, write to or telephone the Notice of Intent Processing Center at (703) 931-3230.

Where to File NOI Form

NOIs must be sent to the following address:

Storm Water Notice of Intent (4203)
USEPA
401 M. Street, SW
Washington, D.C. 20460

Do not send Storm Water Pollution Prevention Plans (SWPPPs) to the above address. For overnight/express delivery of NOIs, please include the room number 2104 Northeast Mall and phone number (202) 260-9541 in the address.

When to File

This form must be filed at least 48 hours before construction begins.

Completing the Form

OBTAIN AND READ A COPY OF THE APPROPRIATE EPA STORM WATER CONSTRUCTION GENERAL PERMIT FOR YOUR AREA. To complete this form, type or print, using uppercase letters, in the appropriate areas only. Please place each character between the marks (abbreviate if necessary to stay within the number of characters allowed for each item). Use one space for breaks between words, but not for punctuation marks unless they are needed to clarify your response. If you have any questions on this form, call the Notice of Intent Processing Center at (703) 931-3230.

Section I. Facility Owner/Operator (Applicant) Information

Provide the legal name, mailing address, and telephone number of the person, firm, public organization, or any other entity that meet either of the following two criteria: (1) they have operational control over construction plans and specifications, including the ability to make modifications to those plans and specifications; or (2) they have the day-to-day operational control of those activities at the project necessary to ensure compliance with SWPPP requirements or other permit conditions. Each person that meets either of these criteria must file this form. Do not use a colloquial name. Correspondence for the permit will be sent to this address.

Enter the appropriate letter to indicate the legal status of the owner/operator of the project: F = Federal; S = State; M = Public (other than federal or state); P = Private.

Section II. Project/Site Information

Enter the official or legal name and complete street address, including city, county, state, zip code, and phone number of the project or site. If it lacks a street address, indicate with a general statement the location of the site (e.g., intersection of State Highways 61 and 34). Complete site information must be provided for permit coverage to be granted.

The applicant must also provide the latitude and longitude of the facility in degrees, minutes, and seconds to the nearest 15 seconds. The latitude and longitude of your facility can be located on USGS quadrangle maps. Quadrangle maps can be obtained by calling 1-800 USA MAPS. Longitude and latitude may also be obtained at the Census Bureau internet site: <http://www.census.gov/cgl-bin/gazettea>.

Latitude and longitude for a facility in decimal form must be converted to degrees, minutes and seconds for proper entry on the NOI form. To convert decimal latitude or longitude to degrees, minutes, and seconds, follow the steps in the following example.

Convert decimal latitude 45.1234567 to degrees, minutes, and seconds.

- 1) The numbers to the left of the decimal point are degrees.
- 2) To obtain minutes, multiply the first four numbers to the right of the decimal point by 0.006. $1234 \times .006 = 7.404$.
- 3) The numbers to the left of the decimal point in the result obtained in step 2 are the minutes: 7.
- 4) To obtain seconds, multiply the remaining three numbers to the right of the decimal from the result in step 2 by 0.06: $404 \times 0.06 = 24.24$. Since the numbers to the right of the decimal point are not used, the result is 24".
- 5) The conversion for 45.1234 = 45° 7' 24".

Indicate whether the project is on Indian Country Lands.

Indicate if the Storm Water Pollution Prevention Plan (SWPPP) has been developed. Refer to Part IV of the general permit for information on SWPPPs. To be eligible for coverage, a SWPPP must have been prepared.

Optional: Provide the address and phone number where the SWPPP can be viewed if different from addresses previously given. Check appropriate box.

Enter the name of the closest water body which receives the project's construction storm water discharge.

Enter the estimated construction start and completion dates using four digits for the year (i.e. 05/27/1998).

Enter the estimated area to be disturbed including but not limited to: grubbing, excavation, grading, and utilities and infrastructure installation. Indicate to the nearest acre; if less than 1 acre, enter "1." Note: 1 acre = 43,560 sq. ft.

Indicate your best estimate of the likelihood of storm water discharges from the project. EPA recognizes that actual discharges may differ from this estimate due to unforeseen or chance circumstances.

Indicate if there are any listed endangered or threatened species, or designated critical habitat in the project area.

Indicate which Part of the permit that the applicant is eligible with regard to protection of endangered or threatened species, or designated critical habitat.

Section III. Certification

Federal Statutes provide for severe penalties for submitting false information on this application form. Federal regulations require this application to be signed as follows:

For a corporation: by a responsible corporate officer, which means: (i) president, secretary, treasurer, or vice president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

For a partnership or sole proprietorship: by a general partner of the proprietor, or

For a municipality, state, federal, or other public facility: by either a principal executive or ranking elected official. An unsigned or undated NOI form will not be granted permit coverage.

Paperwork Reduction Act Notice

Public reporting burden for this application is estimated to average 3.7 hours. This estimate includes time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding the burden estimate, any other aspect of the collection of information, or suggestions for improving this form, including any suggestions which may increase or reduce this burden to: Director, OPPE Regulatory Information Division (2137), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460. Include the OMB control number on any correspondence. Do not send the completed form to this address.

Storm Water

Region 6 NPDES General Permit for Storm Water Discharge from Construction Activity

PERMIT ACTION:

EPA Region 6 reissued the General Permit for Storm Water Discharge from Construction Activity. The permit was signed by Region 6 on Wednesday, June 24, 1998, and published in the Federal Register on July 6, 1997 [63 Fed. Reg. 36489-36519]. You may obtain the new permit in the [Forms/Documents](#) web page in Adobe Acrobat format or you may phone the Office of Water Resource Center at (202)260-7786 to have a copy mailed to you.

For those ongoing construction projects (i.e., a construction project which started prior to the effective date of this permit), a complete revised Notice of Intent Form (NOI) (EPA Form 3510-9) must be submitted within 90 days from the effective date of the permit in order to obtain coverage. However, applicants who have previously submitted an NOI for permit coverage prior to the effective date of this permit will not be required to complete the endangered species certification process as explained below.

PERMIT REQUIREMENTS:

A NOI form must be submitted to obtain coverage under the permit

The permits authorizes the discharge storm water associated with construction activity from:

- the States of New Mexico and Texas;
- Indian Country lands in Louisiana, Oklahoma, Texas and New Mexico (except Navajo Reservation Lands and Ute Mountain Reservation Lands); and
- oil and gas construction in the State of Oklahoma.

The permit covers storm water associated with construction activity which:

- disturbs at least five acres, or
- disturbs less than five acres, but is part of a larger common

plan of development or sale with the potential to cumulatively disturb five or more acres

The most significant changes from the 1992 permits include:

- Permit applicants which start construction after the effective date of the permit and any facility identified by EPA as having an impact on endangered species will now be required to certify that their discharge will not affect listed endangered species and their habitats. The permit provides a six step process to assist applicants in pursuing certification:

Step One: Determine if the Construction Site Is Found Within Designated Critical Habitat for Listed Species

Step Two: Determine if Listed Species are Located in the County(ies) Where the Construction Activity Will Occur.

Step Three: Determine if any Federally Listed Endangered and Threatened Species May Be Present in the Project Area

Step Four: Determine if Listed Species or Critical Habitat are likely to be Adversely Affected by the Construction Activity's Storm Water Discharges or Storm Water Discharge-related Activities.

Step Five: Determine if Measures Can Be Implemented To Avoid any Adverse Effects

Step Six: If a determination has been made that construction activity will affect endangered species, then the applicant must receive clearance from Fish and Wildlife Services and/or the National Marine Fisheries Service to obtain permit coverage.

- Allows those construction sites under five acres which designated as causing an impact to surrounding waterways to obtain coverage under the General permit rather than having to apply for an individual permit.
- A requirement to post at the construction site the permit number or copy of the NOI if a permit number has not been assigned; along with a brief description of the project; and
- Storm water pollution prevention plan performance objectives have been added.

BACKGROUND:

The 1987 Congressional Amendments to the Clean Water Act require EPA to control pollution from storm water discharges. Regulations were finalized by EPA in 1990, and storm water permits for construction sites disturbing five or more acres were required starting in September 1992.

The EPA's storm water program, in effect since 1990, has significantly improved the nation's surface waters by reducing polluted runoff from urban storm sewers and numerous industrial activities, including construction sites larger than 5 acres. In 1992, roughly 46% of water quality impairments were attributed to urban storm water runoff. Urban storm water can be polluted by sediments, illegal toxic discharges, oil and grease and other pollutants. This untreated storm water goes through storm sewers and into waterways.

EPA uses a general permit to provide coverage for construction operations disturbing 5 or more acres. EPA Region 6 receives more than 450 new permit requests a month and handles about 63% of the nation's EPA-regulated construction storm water permit requests.

Region 6 issues storm water permits in Texas and New Mexico. In the other Region 6 states (Arkansas, Oklahoma, and Louisiana), the state conducts the storm water permitting program.

All storm water construction permits expired in September 1997.

ADDITIONAL INFORMATION:

For further information on the NPDES Construction General Permits, call the EPA Region 6 Storm Water Hotline at 1-800-245-6510.

Storm Water Pollution Prevention Plan

This plan has been prepared in accordance with the requirements of the Final NPDES General Permit for Storm Water Discharges from Construction Sites, as published in the Federal Register on September 9, 1992. Should contract documents conflict with the minimum requirements of the General Permit, State or local requirements, the more stringent requirements shall apply.

In accordance with the requirements of the NPDES General Permit for Storm Water Discharges from construction sites, all contractors and subcontractors shall at all times take necessary measures to prevent the flow of sediment and other materials from the work site into the storm sewer system or to any receiving water. Such measures may include, but are not limited to, the placement of straw bale erosion checks and inlet protection, silt fence, riprap stabilization, grassing, sodding, etc.

I. Site Description

A. Nature of the construction activity

This roadway construction project lies between Addison Road and the Dallas North Tollway in Addison, Texas. This is a linear project approximately 2,800 feet in length with an average width of 100 feet. This new roadway will consist of 4, 5, and 6 lane divided thoroughfare. Discharges from the site ultimately enter White Rock Creek.

B. Sequence of major activities which disturb soil. (Descriptive)

This project will be constructed in five phases. Phases 1 and 2, on the west side of Quorum Drive, will be constructed first, followed by Phases 3 through 5, between Quorum Drive and the tollway.

Major soil disturbing activities that will take place include:

- Clearing and grubbing
- Rough grading/Site preparation
- Storm sewer/utilities construction
- Paving
- Cleanup/Final stabilization

The site drainage areas and grading are indicated on the drawings and maps found in the appendix.

C. Estimates of total area & area to be disturbed

The total area of this site is 14.22 acres, which includes the construction staging area as shown on the pollution control plan. All of the site will be disturbed by construction. The areas of disturbance are shown on the pollution control plan.

D. Estimate of post-construction runoff coefficient

The runoff coefficient for this project will not change significantly as a result of this construction effort.

E. Existing data giving soils information and quality of any discharge from the site

No data exist on storm water runoff quality from this project.

F. Site map showing: The following information can be found on the maps and plan sheets given in the Appendix.

- Site drainage patterns
- Approximate slopes after grading
- Areas of soil disturbance
- Outline of areas of disturbance
- Location of major structural & non-structural controls
- Surface waters

G. Name of and location of discharges to receiving water(s) and area of wetland acreage at the site

Storm water runoff from this site will discharge to the Town of Addison drainage system, which ultimately discharges to White Rock Creek. No wetlands have been identified on this site.

II. Controls - Describe appropriate control measures and implementation sequencing for each major activity.

In general, for this project the Contractor shall be responsible for the selection and implementation of erosion and sedimentation control and stabilization measures as necessary. Appropriate preventative and control measures shall be implemented prior to commencing any activity which disturbs the existing surface or could otherwise be considered a pollutant source. The Contractor shall take such measures as necessary to assure compliance with the requirements and intent of the NPDES General Permit for storm water discharges from this project. Such measures shall include, but are not limited to the installation and maintenance of the following:

- Perimeter controls such as silt fence, straw bales, or equivalent to prevent offsite sedimentation and/or to prevent run-on to the site.
- Silt fence, straw bale, or equivalent erosion checks for ditch and inlet protection to eliminate soils, sediments, or other debris from entering the drainage systems or receiving waters.
- Silt fence, straw bale, or equivalent sediment barrier around the perimeter of stockpiled soils.
- Other controls, as warranted by field conditions and sequencing.
- Final stabilization of the site shall be achieved by the Contractor prior to acceptance of the project by the owner.

At a minimum, the Contractor shall install the measures shown on the Erosion Control Plan and shall modify/extend these measures as warranted by field conditions and construction sequencing.

A. Erosion & Sediment Controls

1. Stabilization practices

Describe interim and permanent practices including site-specific scheduling of implementation. Include a record of dates when the major activities occur, temporarily or permanently cease, and when stabilization measures are initiated. (See Glossary)

To reduce the erosion potential of disturbed areas, temporary seeding, permanent seeding, mulching or sod stabilization procedures, or their equivalent, must be initiated on all disturbed areas within 14 calendar days of last activity in that area as required by the General Permit.

Specific locations of stabilization measures are not shown on the plans.

The Contractor will keep a record of when major activities occur, temporarily or permanently cease, and when stabilization measures are initiated. A copy of this record will be kept with this plan on-site.

2. Structural practices

Describe structural practices used to divert flows, store flows, or otherwise limit runoff and discharge of pollutants. (See Glossary)

The disturbed surface areas for this project are comprised of relatively small drainage areas. Within these small areas, erosion and sedimentation can be effectively controlled using inlet protection, silt fences, straw bales, and sediment traps.

During construction and until the site is adequately stabilized, ditches, area drains, basin and drop inlets shall have stone siltation structures, straw bale erosion checks, straw bale dikes, or equivalent protection installed to significantly reduce the amount of soil and silt entering the underground drainage system and/or receiving waters. All stockpiled soil will be surrounded by a straw bale dike, silt fence, or equivalent to properly control sediment runoff. At a minimum, silt fences will be used as sediment controls on the sideslope and downslope boundaries of the construction and staging areas.

The Contractor is encouraged to limit the number of access points to the site as both a safety measure and a pollution prevention measure. The Contractor shall submit proposed locations of **Stabilized Construction Entrances**, if different from those shown on the plans, to the owner. The Contractor will at all times take such measures as required to minimize off-site tracking of sediments and debris. Where offsite tracking does occur, the Contractor shall promptly remove any such material or debris.

The proposed measures for erosion and sedimentation control during construction satisfy the intent of State and local requirements. The applicable erosion control drawings are given in the Appendix (Erosion Control Drawings and Details).

B. Storm Water Management

- *Describe measures to be installed to control pollutants in storm water discharges occurring after completion of construction operations.*
- *Describe the technical basis used to select practices where flows exceed pre-development levels.*
- *Velocity dissipation devices shall be placed at discharge locations and along the length of any outfall channel to provide a non-erosive velocity flow to a water course.*

Permanent erosion control and sedimentation control measures will be in place when construction is completed and prior to submittal of the Notice Of Termination. Specific locations of these stabilization measures are given in the drawings consist generally of the following items.

Permanent seeding, mulching or sod stabilization procedures, or their equivalent, shall be initiated on all disturbed areas within fourteen (14) calendar days of last activity in that area. Protective stone rip-rap, gabions, or equivalent may be utilized in areas with high erosion potential, as indicated on the drawings.

The proposed measures for erosion and sedimentation control after construction satisfy the intent of the State and local requirements.

C. Other Controls

- *Waste disposal; prevent discharges of solid, sanitary, septic and hazardous waste materials.*
- *Minimize off-site tracking of sediments and dust generation.*
- *Ensure and demonstrate compliance with State/local solid, sanitary, septic or hazardous waste regulations.*

The Contractor shall at all times take such measures as required to minimize off-site tracking of sediments and debris. Where offsite tracking does occur, the Contractor shall promptly remove any such material or debris.

The Contractor shall comply with all Federal, State, and local regulations regarding the collection, storage, and disposal of solid, sanitary, septic, or hazardous waste materials.

Other Permits

No other discharge permits exist for this site.

III. Maintenance

Describe procedures to ensure the timely maintenance of vegetation, control measures, and other protective measures identified in the site plan.

The Contractor shall protect erosion and sediment control devices from damage and shall repair and replace dikes, erosion checks, sediment traps, silt fences, and overflow outlets when damaged by construction, natural, and other physical causes. All soil erosion and sediment control devices shall function as originally intended.

Where applicable, the Contractor shall maintain sod by watering, fertilizing, weeding, mowing, and trimming and shall replace sod which has been eroded, damaged by construction activities, deteriorated, or diseased.

All stock piled soil shall be surrounded by a straw bale dike, silt fence, or equivalent to properly control sediment runoff. While stockpiles are not directly addressed in the contract documents, this preventative measure is a requirement to comply with this plan.

Temporary seeding, permanent seeding, mulching or sod stabilization procedures, or their equivalent, must be initiated on all disturbed areas within fourteen (14) calendar days of last activity in that area.

Stabilized Construction Entrances may be top-dressed with additional stone as necessary to maintain their effectiveness. The Contractor will at all times take such measures as required to minimize off-site tracking of sediments and debris. Where offsite tracking does occur, the Contractor shall promptly remove any such material or debris.

Accumulated sediment shall be removed and disposed of as required to keep the control measure functional. Excess accumulation of sediment at erosion control devices will not be permitted.

Inspection services provided by the owner or owner's representatives do not relieve the Contractor's responsibility for inspection and maintenance of the erosion control measures or his duty to comply with this plan and the conditions of the NPDES General Permit.

IV. Inspections

The site will be inspected by a qualified representative of the Contractor and Owner at least once every seven calendar days and within 24 hours of the end of a rainfall event of 0.5 inches or greater. Where sites have been finally stabilized, inspection will be conducted at least once every month until a Notice of Termination (NOT) is filed for this project.

For this project, the Engineer is not providing inspection services.

The inspections shall be for evidence of or the potential for pollutants entering the drainage system. In particular, inspection should be made of disturbed areas, storage areas, discharge locations, erosion and sediment control measures, and points of entrance and exit to the site. The inspector shall indicate in his report if rainfall has occurred since the last inspection. When possible, the date and volume of rainfall should also be recorded.

A written inspection report will be kept and filed with this plan. Any modifications or revisions to the plan based on results of the inspections shall be made for timely implementation of any changes within seven days of the inspection. Reports shall identify any incidents of non-compliance with the SWPPP and the General Permit and actions taken to ensure compliance.

Inspection services provided by the owner or owner's representatives do not relieve the Contractor's responsibility for inspection and maintenance of the erosion control measures or his duty to comply with this plan and the conditions of the General Permit.

V. Non-Storm Water Discharges

Sources of non-storm water discharges, except from fire-fighting activities, shall be included along with appropriate pollution prevention measures for these flows.

There are no anticipated non-storm water discharges from this site.

VI. Notice Of Intent (NOI)

For this project, the Owner and Contractor will each file a Notice Of Intent (NOI) with the EPA. Copies of the NOI's should also be forwarded to the Town of Addison.

Under no circumstances will any construction activities identified as potential pollutant sources commence on this contract until 48 hours after submittal of the NOI.

A copy of each NOI submitted for this project will be posted at the construction site in a prominent place for public viewing. (See section X.)

Copies are also included in the Appendix of this document.

VII. Certification of Contractors

Identify, for each measure identified in the plan, the contractor(s) and/or sub-contractor(s) that will implement the measure. All contractor(s) and sub-contractor(s) must sign a copy of the certification statement (example attached) and those certifications will be included in this plan. Also include copies of any NOI's filed in association with this project.

The General contractor shall provide the Owner with a list of their subcontractors. This list shall also identify the responsibilities of the subcontractor with regard to the implementation of and compliance with this plan and the NPDES Storm Water Discharge Permit. This list shall be kept in the Appendix.

Each contractor and subcontractor performing work which will have an impact on the pollution potential of this project shall be identified herein. Subcontractor information will be provided by the general contractor.

It is the responsibility of the General Contractor to obtain certification forms from his subcontractors prior to any work being performed by said subcontractor on this project. A brief description of the work to be performed will be included with the certification. Certification by the subcontractors does not relieve the Contractor's responsibility for inspection and maintenance of the erosion control measures or his duty to comply with this plan and the conditions of the General Permit. The signed certification forms will be submitted to the owner and will be included as part of this plan (File in the Appendix).

An example certification form is given in the Appendix. Copies of this form may be used.

VIII. Notice of Termination

A Notice Of Termination (NOT) may be filed for each co-permittee after the portion of work for which said co-permittee is responsible is finally stabilized and accepted by Town of Addison (owner). The Contractor shall not file an NOT without the prior approval and acceptance of the work by the owner. A copy of any NOT's filed in association with this project shall be submitted to the owner and filed with this plan.

IX. Maintenance of Records

This plan and the records required herein will be kept by the permittee(s) for a minimum period of three (3) years following the date of final stabilization in accordance with the requirements of the General Permit.

X. Posting of permit documents

A copy of any Notice Of Intent (NOI) forms submitted for this project will be posted, along with a project description, in accordance with the NPDES General Permit requirements and regulations. Posting can be on the job-site bulletin board or work trailer. Copies of these forms are also contained in this document.

XI. Plan Revisions/Modifications

This plan shall be amended by the Contractor whenever there is a change in design, construction, operation, or maintenance, which has a significant effect on the potential for the discharge of pollutants to the waters of the United States and which has not otherwise been addressed in the plan or if the plan proves to be ineffective in eliminating or significantly minimizing pollutants or in otherwise achieving the general objectives of controlling pollutants in storm water discharges from the site.

A record shall be kept of any revisions/modifications identifying the reason for the change, the date made, the date implemented, and the section revised. This record will be filed in the Appendix of this document.

GLOSSARY:

NOTE: This glossary is to assist in defining the terms and practices used in this plan. Should contract documents conflict with the minimum requirements of the EPA General Permit, the more stringent of the two shall apply.

Erosion and Sediment Controls:

Structural controls include silt fences, earth dikes, drainage swales, sediment traps, check dams, subsurface drains, pipe slope drains, level spreaders, storm drain inlet protection, rock outlet protection, reinforced soil retaining systems, gabions, and temporary or permanent sediment basins.

Non-structural controls include waste disposal, control of off-site vehicle tracking, and compliance with State and/or local solid, sanitary or septic waste disposal regulations.

For common drainage areas > 10 disturbed acres, a sediment basin with a volume of 3,600 cubic feet per acre drained, or equivalent control measures, shall be provided until final stabilization of the site. Where a basin is not attainable, smaller basins and/or sediment traps should be used.

At a minimum, silt fences or equivalent sediment controls are required for all sideslope and downslope boundaries of the construction area.

These minimum controls shall also apply to drainage locations serving < 10 acres unless a sediment basin with a storage volume of 3,600 cubic feet per acre drained is provided.

Stabilization Measures:

Stabilization practices may include temporary seeding, permanent seeding, mulching, geotextiles, sod stabilization, vegetative buffer strips, protection of trees, preservation of mature vegetation, and other appropriate measures.

Stabilization measures will be initiated as soon as practicable where construction activities have temporarily or permanently ceased. The measures will be initiated no more than 14 days after activity has temporarily or permanently ceased except where construction activity will resume on that portion of the site within 21 days or initiation of stabilization measures is precluded by snow or seasonal arid conditions. Arid conditions may occur in areas where the average rainfall is less than 20 inches.

Storm Water Management:

Practices include wet ponds, retention structures, flow attenuation using vegetated swales and natural depressions, infiltration and sequential systems using one or more of these practices.

APPENDIX

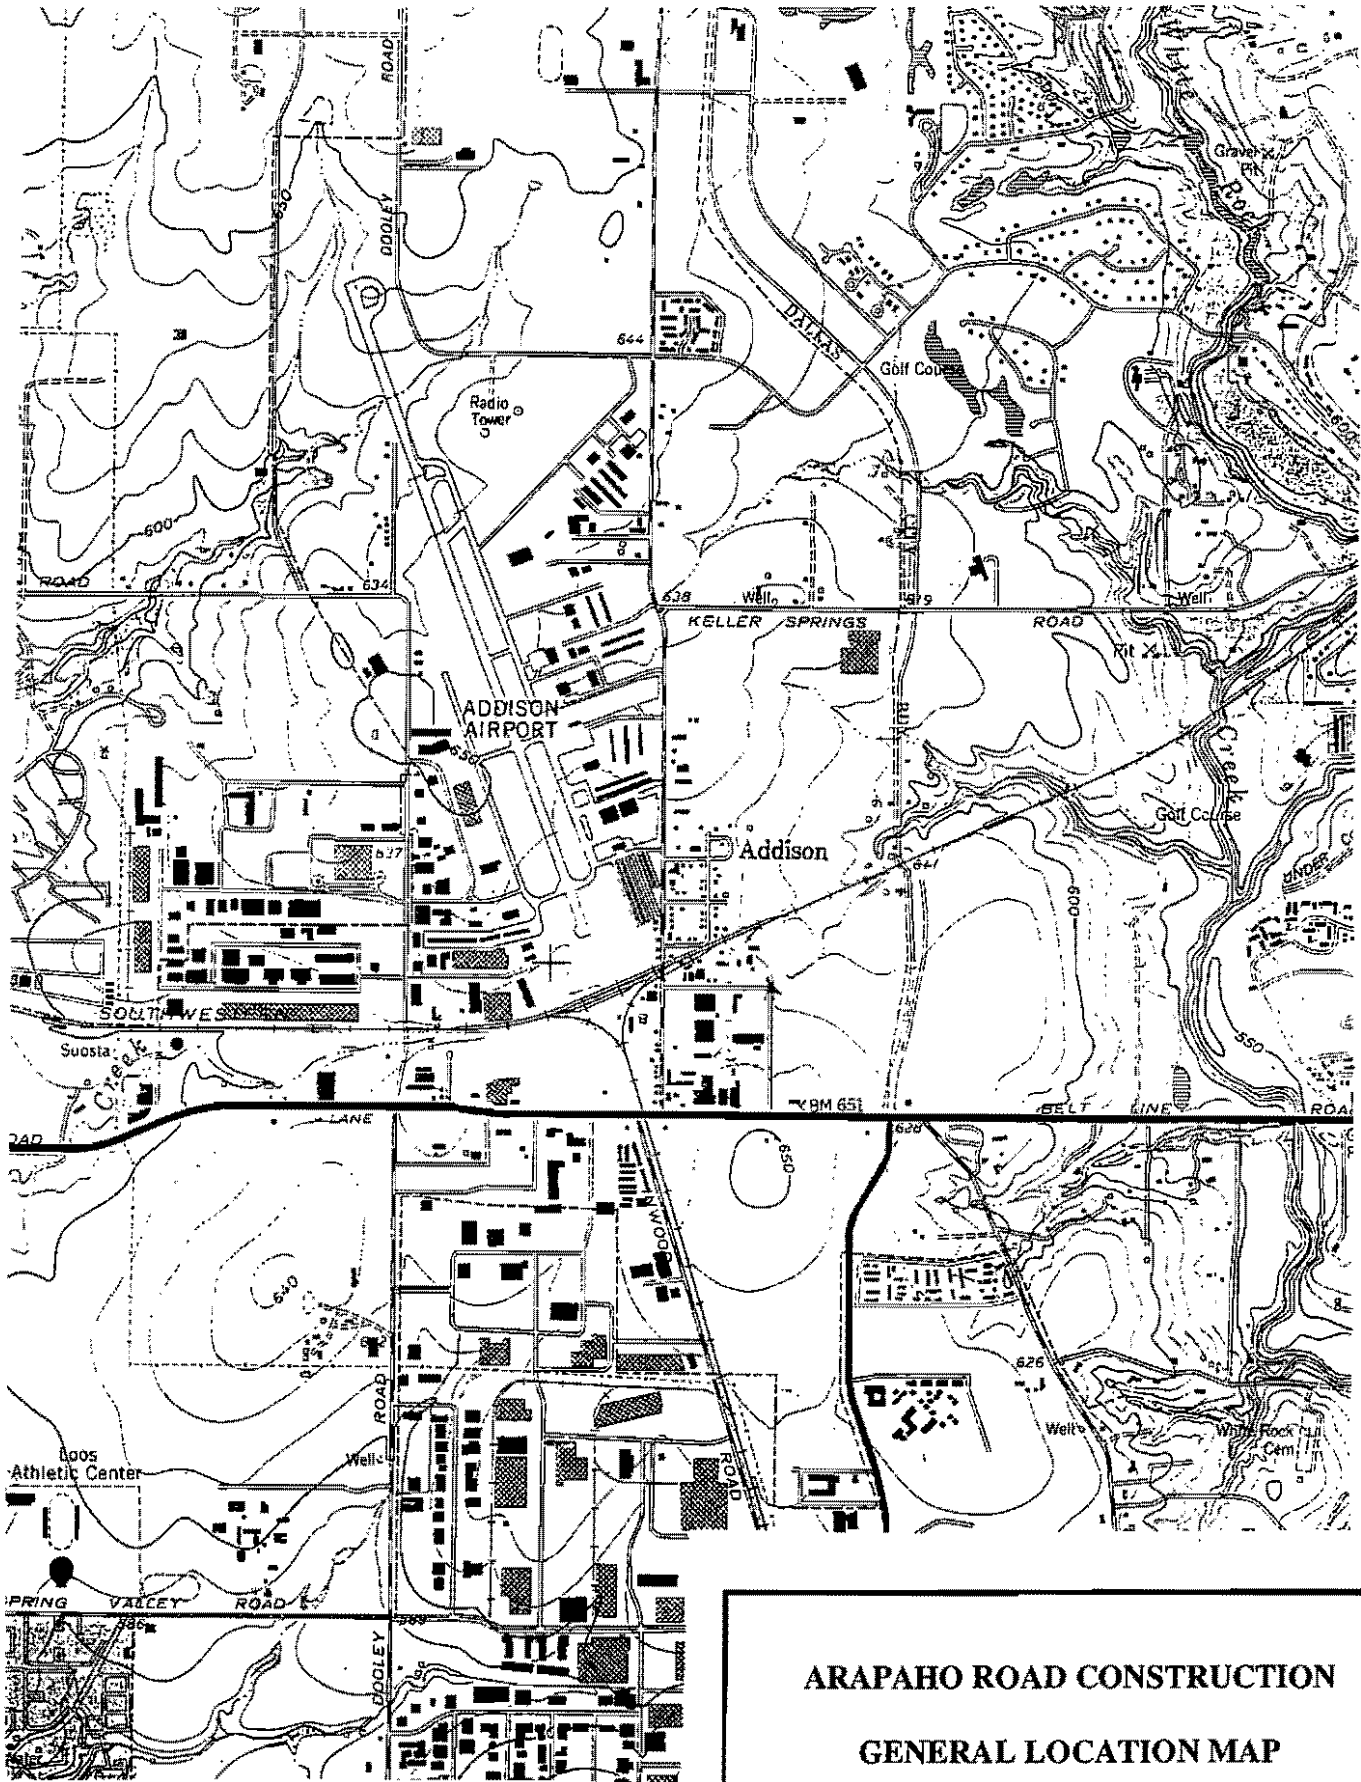

This appendix contains:

- Site Maps
- Erosion & Sediment Control Plan & Details
- Inspection Forms & Reports
- Notice Of Intent Forms (Copies)
- Certification of Contractors
- Notice of Termination Forms (Copies)
- Record of major soil disturbing activities
- Record of Revisions/Modifications

NPDES
FORM

United States Environmental Protection Agency
Washington, DC 20460

Notice of Intent (NOI) for Storm Water Discharges Associated with Industrial Activity Under a NPDES Permit

Submission of this Notice of Intent constitutes notice that the party identified in Section II of this form intends to be authorized by a NPDES permit issued for storm water discharges associated with industrial activity in the State identified in Section III of this form. Becoming a permittee obligates such discharger to comply with the terms and conditions of the permit. ALL NECESSARY INFORMATION MUST BE PROVIDED ON THIS FORM.

I. Permit Selection: You must indicate the NPDES Storm Water general permit under which you are applying for coverage. Check one of these.

Baseline Industrial

Baseline Construction

Multi-Sector (Group Permit)

II. Facility Operator Information

Name: ED BELL, CONSTRUCTION Phone: 214 / 358-6581

Address: 10605 HARRY HINES BOULEVARD Status of Owner/Operator: P

City: DALLAS State: TX ZIP Code: 75354

III. Facility/Site Location Information

Name: ARAPAHO ROAD CONSTRUCTION

Is the facility located on Indian Lands? (Y or N)

Address:

City: ADDISON State: TX ZIP Code: 75001

Latitude: 325730 Longitude: 964930 Quarter: Section: Township: Range:

IV. Site Activity Information

MS4 Operator Name: TOWN OF ADDISON

Receiving Water Body: WHITE ROCK CREEK

If you are filing as a co-permittee, enter storm water general permit number:

SIC or Designated Activity Code: Primary: CD 2nd:

Is the facility required to submit monitoring data? (1, 2, 3, or 4) 1

If You Have Another Existing NPDES Permit, Enter Permit Number:

Multi-Sector Permit Applicants Only:

Based on the instructions provided in Addendum H of the Multi-Sector permit, are species identified in Addendum H in proximity to the storm water discharges to be covered under this permit, or the areas of BMP construction to control those storm water discharges? (Y or N)

Will construction (land disturbing activities) be conducted for storm water controls? (Y or N)

Is applicant subject to and in compliance with a written historic preservation agreement? (Y or N)

V. Additional Information Required for Construction Activities Only

Project Start Date: Completion Date:

Estimated Area to be Disturbed (in Acres): 1.4

Is the Storm Water Pollution Prevention Plan in compliance with State and/or Local sediment and erosion plans? (Y or N) Y

VI. Certification: The certification statement in Box 1 applies to all applicants. The certification statement in Box 2 applies only to facilities applying for the Multi-Sector storm water general permit.

BOX 1 ALL APPLICANTS
I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

BOX 2 MULTI-SECTOR STORM WATER GENERAL PERMIT APPLICANTS ONLY:
I certify under penalty of law that I have read and understand Part I.B. eligibility requirements for coverage under the Multi-Sector storm water general permit, including those requirements relating to the protection of species identified in Addendum H.
To the best of my knowledge, the discharges covered under this permit, and construction of BMPs to control storm water run-off, are not likely to and will not likely adversely affect any species identified in Addendum H of the Multi-Sector storm water general permit or are otherwise eligible for coverage due to previous authorization under the Endangered Species Act.
To the best of my knowledge, I further certify that such discharges, and construction of BMPs to control storm water run-off, do not have an effect on properties listed or eligible for listing on the National Register of Historic Places under the National Historic Preservation Act, or are otherwise eligible for coverage due to a previous agreement under the National Historic Preservation Act.
I understand that continued coverage under the Multi-Sector general permit is contingent upon maintaining eligibility as provided for in Part I.B.

Signature:

Instructions - EPA Form 3510-6
Notice Of Intent (NOI) For Storm Water Discharges Associated With Industrial Activity
To Be Covered Under a NPDES General Permit

Who Must File A Notice Of Intent (NOI) Form

Federal law at 40 CFR Part 122 prohibits point source discharges of storm water associated with industrial activity to a water body(ies) of the U.S. without a National Pollutant Discharge Elimination System (NPDES) permit. The operator of an industrial activity that has such a storm water discharge must submit a NOI to obtain coverage under a NPDES Storm Water General Permit. If you have questions about whether you need a permit under the NPDES Storm Water program, or if you need information as to whether a particular program is administered by EPA or a state agency, telephone or write to the Notice of Intent Processing Center at (703) 931-3230.

Where To File NOI Form

NOIs must be sent to the following address:

Storm Water Notice of Intent (4203)
401 M Street, S.W.
Washington, DC 20460

Completing The Form

You must type or print, using upper-case letters, in the appropriate areas only. Please place each character between the marks. Abbreviate if necessary to stay within the number of characters allowed for each item. Use one space for breaks between words, but not for punctuation marks unless they are needed to clarify your responses. If you have any questions on this form, call the Notice of Intent Processing Center at (703) 931-3230.

Section I Permit Selection

You must indicate the NPDES storm water general permit under which you are applying for coverage. Check one box only. The Baseline Industrial and Baseline Construction permits were issued in September 1992. The Multi-Sector Permit became effective October 1, 1995.

Section II Facility Operator Information

Provide the legal name of the person, firm, public organization, or any other entity that operates the facility or site described in this application. The name of the operator may or may not be the same as the name of the facility. The responsible party is the legal entity that controls the facility's operation, rather than the plant or site manager. Do not use a colloquial name. Enter the complete address and telephone number of the operator.

Enter the appropriate letter to indicate the legal status of the operator of the facility:
F = Federal; S = State; M = Public (other than federal or state); P = Private

Section III Facility/Site Location Information

Enter the facility's or site's official or legal name and complete street address, including city, state, and ZIP code. Do not provide a P.O. Box number as the street address. If applying for a Baseline Permit and the facility or site lacks a street address, indicate the state and either the latitude and longitude of the facility to the nearest 15 seconds of the quarter, section, township, and range (to the nearest quarter section) of the approximate center of the site. If applying for the Multi-Sector Permit indicate the complete street address and either the latitude and longitude of the facility to the nearest 15 seconds of the quarter, section, township, and range (to the nearest quarter section) of the approximate center of the site.

If applicants must indicate whether the facility is located on Indian lands.

Section IV Site Activity Information

If the storm water discharges to a municipal separate storm sewer system (MS4), enter the name of the operator of the MS4 (e.g., municipality name, county name) and the receiving water of the discharge from the MS4. (A MS4 is defined as a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) that is owned or operated by a state, city, town, borough, county, parish, district, association, or other public body which is designed or used for collecting or conveying storm water.)

If the facility discharges storm water directly to receiving water(s), enter the name of the receiving water(s).

If you are filing as a co-permittee and a storm water general permit number has been issued, enter the number in the place provided.

Indicate the monitoring status of the facility. Refer to the permit for information on monitoring requirements. Indicate the monitoring status by entering one of the following:

- 1 = Not subject to monitoring requirements under the conditions of the permit.
- 2 = Subject to monitoring requirements and required to submit data.
- 3 = Subject to monitoring requirements but not required to submit data.
- 4 = Subject to monitoring requirements but submitting certification for monitoring exclusion.

List, in descending order of significance, up to two 4-digit standard industrial classification (SIC) codes that best describe the principal products or services provided at the facility or site identified in Section III of this application. If you are applying for coverage under the construction general permit, enter "CO" (which represents SIC codes 1500-1799).

For industrial activities defined in 40 CFR 122.26(b)(14)(i)-(xi) that do not have SIC codes that accurately describe the principal products produced or services provided, use the following 2-character codes.

- HZ = Hazardous waste treatment, storage, or disposal facilities, including those that are operating under interim status or a permit under subtitle C of RCRA (40 CFR 122.26(b)(14)(iv));
- LF = Landfills, land application sites, and open dumps that receive or have received any industrial wastes, including those that are subject to regulation under subtitle D of RCRA (40 CFR 122.26(b)(14)(v));
- SE = Steam electric power generating facilities, including coal handling sites (40 CFR 122.26(b)(14)(vi));
- TW = Treatment works treating domestic sewage or any other sewage sludge or wastewater treatment device or system, used in the storage, treatment, recycling, and reclamation of municipal or domestic sewage (40 CFR 122.26(b)(14)(x)); or
- CO = Construction activities (40 CFR 122.26(b)(14)(xi)).

If there is another NPDES permit presently issued for the facility or site listed in Section III, enter the permit number. If an application for the facility has been submitted but no permit number has been assigned, enter the application number.

Facilities applying for coverage under the Multi-Sector storm water general permit must answer the last three questions in Section IV. Refer to Addendum H of the Multi-Sector general permit for a list of species that are either proposed or listed as threatened or endangered. "BMP" means "Best Management Practices" that are used to control storm water discharges.

Indicate whether any construction will be conducted to install or develop storm water runoff controls.

Section V Additional Information Required for Construction Activities Only

Construction activities must complete Section V in addition to Sections I through IV. Only construction activities need to complete Section V.

Enter the project start date and the estimated completion date for the entire development plan.

Provide an estimate of the total number of acres of the site on which soil will be disturbed (round to the nearest acre).

Indicate whether the storm water pollution prevention plan for the site is in compliance with approved state and/or local sediment and erosion plans, permits, or storm water management plans.

Section VI Certification

Federal statutes provide for severe penalties for submitting false information on this application form. Federal regulations require this application to be signed as follows:

For a corporation: by a responsible corporate officer, which means: (i) president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

For a partnership or sole proprietorship: by a general partner or the proprietor; or

For a municipality, state, Federal, or other public facility: by either a principal executive officer or ranking elected official.

Paperwork Reduction Act Notice

Public reporting burden for this application is estimated to average 0.5 hours per application, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates, any other aspect of the collection of information, or suggestions for improving this form, including any suggestions which may increase or reduce this burden to: Chief, Information Policy Branch, 2136, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, or Director, Office of Information and Regulator Affairs, Office of Management and Budget, Washington, DC 20503.

Storm Water Pollution Prevention Plan
CONTRACTOR CERTIFICATION

Construction Site: ARAPAHO ROAD CONSTRUCTION
from Addison Road to Dallas North Tollway
Addison, Texas
(As identified in the Storm Water Pollution Prevention Plan and NOL.)

The Storm Water Pollution Prevention Plan (SWPPP) for the referenced project identifies each pollution prevention measure and the contractor(s) responsible for the implementation and maintenance of the measure.

All contractors and subcontractors shall be identified in the SWPPP and must sign a copy of the certification statement given below before conducting any professional service at the site identified in the SWPPP.

Contractor information:
(Name, address, telephone no.) _____

Description of responsibilities: _____

"I certify under penalty of law that I understand the terms and conditions of the general National Pollutant Discharge Elimination System (NPDES) permit that authorizes the storm water discharges associated with industrial activity from the construction site identified as part of this certification."

Contractor's Signature *Date*

Name of Prime Contractor: Ed Bell Construction
(if applicable)

This certification is to be filed in the Storm Water Pollution Prevention Plan. Do not submit to EPA.

Please See Instructions Before Completing This Form

Form Approved. OMB No. 2040-0086
Approval expires: 8-31-95

NPDES
FORM

United States Environmental Protection Agency
Washington, DC 20460

**Notice of Termination (NOT) of Coverage Under the NPDES General Permit
for Storm Water Discharges Associated with Industrial Activity**

Submission of this Notice of Termination constitutes notice that the party identified in Section II of this form is no longer authorized to discharge storm water associated with industrial activity under the NPDES program. ALL NECESSARY INFORMATION MUST BE PROVIDED ON THIS FORM.

I. Permit Information

NPDES Storm Water
General Permit Number: _____

Check Here if You are No Longer
the Operator of the Facility:

Check Here if the Storm Water
Discharge is Being Terminated:

II. Facility Operator Information

Name: _____ Phone: _____

Address: _____

City: _____ State: _____ ZIP Code: _____

III. Facility/Site Location Information

Name: _____

Address: _____

City: _____ State: _____ ZIP Code: _____

Latitude: _____ Longitude: _____ Quarter: _____ Section: _____ Township: _____ Range: _____

IV. Certification: I certify under penalty of law that all storm water discharges associated with industrial activity from the identified facility that are authorized by a NPDES general permit have been eliminated or that I am no longer the operator of the facility or construction site. I understand that by submitting this Notice of Termination, I am no longer authorized to discharge storm water associated with industrial activity under this general permit, and that discharging pollutants in storm water associated with industrial activity to waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by a NPDES permit. I also understand that the submittal of this Notice of Termination does not release an operator from liability for any violations of this permit or the Clean Water Act.

Print Name: _____ Date: _____

Signature: _____

Instructions for Completing Notice of Termination (NOT) Form

Who May File a Notice of Termination (NOT) Form

Permittees who are presently covered under the EPA issued National Pollutant Discharge Elimination System (NPDES) General Permit for Storm Water Discharges Associated with Industrial Activity may submit a Notice of Termination (NOT) form when their facilities no longer have any storm water discharges associated with industrial activity as defined in the storm water regulations at 40 CFR 122.26 (b)(14), or when they are no longer the operator of the facilities.

For construction activities, elimination of all storm water discharges associated with industrial activity occurs when disturbed soils at the construction site have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time, or that all storm water discharges associated with industrial activity from the construction site that are authorized by a NPDES general permit have otherwise been eliminated. Final stabilization means that all soil-disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of 70% of the cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geotextiles) have been employed.

Where to File NOT Form

Send this form to the following address:

Storm Water Notice of Termination
P.O. Box 1185
Newington, VA 22122

Completing the Form

Type or print, using upper-case letters, in the appropriate areas only. Please place each character between the marks. Abbreviate if necessary to stay within the number of characters allowed for each item. Use only one space for breaks between words, but not for punctuation marks unless they are needed to clarify your response. If you have any questions about this form, call the Storm Water Hotline at (703) 821-4823.

PLEASE SEE REVERSE OF THIS FORM FOR FURTHER INSTRUCTIONS

Instructions - EPA Form 3510-7
Notice of Termination (NOT) of Coverage Under The NPDES General Permit
for Storm Water Discharges Associated With Industrial Activity

Section I Permit Information

Enter the existing NPDES Storm Water General Permit number assigned to the facility or site identified in Section III. If you do not know the permit number, contact the Storm Water Hotline at (703) 821-4823.

Indicate your reason for submitting this Notice of Termination by checking the appropriate box:

If there has been a change of operator and you are no longer the operator of the facility or site identified in Section III, check the corresponding box.

If all storm water discharges at the facility or site identified in Section III have been terminated, check the corresponding box.

Section II Facility Operator Information

Give the legal name of the person, firm, public organization, or any other entity that operates the facility or site described in this application. The name of the operator may or may not be the same name as the facility. The operator of the facility is the legal entity which controls the facility's operation, rather than the plant or site manager. Do not use a colloquial name. Enter the complete address and telephone number of the operator.

Section III Facility/Site Location Information

Enter the facility's or site's official or legal name and complete address, including city, state and ZIP code. If the facility lacks a street address, indicate the state, the latitude and longitude of the facility to the nearest 15 seconds, or the quarter, section, township, and range (to the nearest quarter section) of the approximate center of the site.

Section IV Certification

Federal statutes provide for severe penalties for submitting false information on this application form. Federal regulations require this application to be signed as follows:

For a corporation: by a responsible corporate officer, which means: (i) president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

For a partnership or sole proprietorship: by a general partner or the proprietor; or

For a municipality, State, Federal, or other public facility: by either a principal executive officer or ranking elected official.

Paperwork Reduction Act Notice

Public reporting burden for this application is estimated to average 0.5 hours per application, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate, any other aspect of the collection of information, or suggestions for improving this form, including any suggestions which may increase or reduce this burden to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, or Director, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

Storm Water Pollution Prevention Plan

This plan has been prepared in accordance with the requirements of the Final NPDES General Permit for Storm Water Discharges from Construction Sites, as published in the Federal Register on September 9, 1992. Should contract documents conflict with the minimum requirements of the General Permit, State or local requirements, the more stringent requirements shall apply.

In accordance with the requirements of the NPDES General Permit for Storm Water Discharges from construction sites, all contractors and subcontractors shall at all times take necessary measures to prevent the flow of sediment and other materials from the work site into the storm sewer system or to any receiving water. Such measures may include, but are not limited to, the placement of straw bale erosion checks and inlet protection, silt fence, riprap stabilization, grassing, sodding, etc.

I. Site Description

A. Nature of the construction activity

This roadway construction project lies between Addison Road and the Dallas North Tollway in Addison, Texas. This is a linear project approximately 2,800 feet in length with an average width of 100 feet. This new roadway will consist of 4, 5, and 6 lane divided thoroughfare. Discharges from the site ultimately enter White Rock Creek.

B. Sequence of major activities which disturb soil. (Descriptive)

This project will be constructed in five phases. Phases 1 and 2, on the west side of Quorum Drive, will be constructed first, followed by Phases 3 through 5, between Quorum Drive and the tollway.

Major soil disturbing activities that will take place include:

- Clearing and grubbing
- Rough grading/Site preparation
- Storm sewer/utilities construction
- Paving
- Cleanup/Final stabilization

The site drainage areas and grading are indicated on the drawings and maps found in the appendix.

C. Estimates of total area & area to be disturbed

The total area of this site is 14.22 acres, which includes the construction staging area as shown on the pollution control plan. All of the site will be disturbed by construction. The areas of disturbance are shown on the pollution control plan.

D. Estimate of post-construction runoff coefficient

The runoff coefficient for this project will not change significantly as a result of this construction effort.

E. Existing data giving soils information and quality of any discharge from the site

No data exist on storm water runoff quality from this project.

F. Site map showing: The following information can be found on the maps and plan sheets given in the Appendix.

- Site drainage patterns
- Approximate slopes after grading
- Areas of soil disturbance
- Outline of areas of disturbance
- Location of major structural & non-structural controls
- Surface waters

G. Name of and location of discharges to receiving water(s) and area of wetland acreage at the site

Storm water runoff from this site will discharge to the Town of Addison drainage system, which ultimately discharges to White Rock Creek. No wetlands have been identified on this site.

II. Controls - Describe appropriate control measures and implementation sequencing for each major activity.

In general, for this project the Contractor shall be responsible for the selection and implementation of erosion and sedimentation control and stabilization measures as necessary. Appropriate preventative and control measures shall be implemented prior to commencing any activity which disturbs the existing surface or could otherwise be considered a pollutant source. The Contractor shall take such measures as necessary to assure compliance with the requirements and intent of the NPDES General Permit for storm water discharges from this project. Such measures shall include, but are not limited to the installation and maintenance of the following:

- Perimeter controls such as silt fence, straw bales, or equivalent to prevent offsite sedimentation and/or to prevent run-on to the site.
- Silt fence, straw bale, or equivalent erosion checks for ditch and inlet protection to eliminate soils, sediments, or other debris from entering the drainage systems or receiving waters.
- Silt fence, straw bale, or equivalent sediment barrier around the perimeter of stockpiled soils.
- Other controls, as warranted by field conditions and sequencing.
- Final stabilization of the site shall be achieved by the Contractor prior to acceptance of the project by the owner.

At a minimum, the Contractor shall install the measures shown on the Erosion Control Plan and shall modify/extend these measures as warranted by field conditions and construction sequencing.

A. Erosion & Sediment Controls

1. Stabilization practices

Describe interim and permanent practices including site-specific scheduling of implementation. Include a record of dates when the major activities occur, temporarily or permanently cease, and when stabilization measures are initiated. (See Glossary)

To reduce the erosion potential of disturbed areas, temporary seeding, permanent seeding, mulching or sod stabilization procedures, or their equivalent, must be initiated on all disturbed areas within 14 calendar days of last activity in that area as required by the General Permit.

Specific locations of stabilization measures are not shown on the plans.

The Contractor will keep a record of when major activities occur, temporarily or permanently cease, and when stabilization measures are initiated. A copy of this record will be kept with this plan on-site.

2. Structural practices

Describe structural practices used to divert flows, store flows, or otherwise limit runoff and discharge of pollutants. (See Glossary)

The disturbed surface areas for this project are comprised of relatively small drainage areas. Within these small areas, erosion and sedimentation can be effectively controlled using inlet protection, silt fences, straw bales, and sediment traps.

During construction and until the site is adequately stabilized, ditches, area drains, basin and drop inlets shall have stone siltation structures, straw bale erosion checks, straw bale dikes, or equivalent protection installed to significantly reduce the amount of soil and silt entering the underground drainage system and/or receiving waters. All stockpiled soil will be surrounded by a straw bale dike, silt fence, or equivalent to properly control sediment runoff. At a minimum, silt fences will be used as sediment controls on the sideslope and downslope boundaries of the construction and staging areas.

The Contractor is encouraged to limit the number of access points to the site as both a safety measure and a pollution prevention measure. The Contractor shall submit proposed locations of **Stabilized Construction Entrances**, if different from those shown on the plans, to the owner. The Contractor will at all times take such measures as required to minimize off-site tracking of sediments and debris. Where offsite tracking does occur, the Contractor shall promptly remove any such material or debris.

The proposed measures for erosion and sedimentation control during construction satisfy the intent of State and local requirements. The applicable erosion control drawings are given in the Appendix (Erosion Control Drawings and Details).

B. Storm Water Management

- *Describe measures to be installed to control pollutants in storm water discharges occurring after completion of construction operations.*
- *Describe the technical basis used to select practices where flows exceed pre-development levels.*
- *Velocity dissipation devices shall be placed at discharge locations and along the length of any outfall channel to provide a non-erosive velocity flow to a water course.*

Permanent erosion control and sedimentation control measures will be in place when construction is completed and prior to submittal of the Notice Of Termination. Specific locations of these stabilization measures are given in the drawings consist generally of the following items.

Permanent seeding, mulching or sod stabilization procedures, or their equivalent, shall be initiated on all disturbed areas within fourteen (14) calendar days of last activity in that area. Protective stone riprap, gabions, or equivalent may be utilized in areas with high erosion potential, as indicated on the drawings.

The proposed measures for erosion and sedimentation control after construction satisfy the intent of the State and local requirements.

C. Other Controls

- *Waste disposal; prevent discharges of solid, sanitary, septic and hazardous waste materials.*
- *Minimize off-site tracking of sediments and dust generation.*
- *Ensure and demonstrate compliance with State/local solid, sanitary, septic or hazardous waste regulations.*

The Contractor shall at all times take such measures as required to minimize off-site tracking of sediments and debris. Where offsite tracking does occur, the Contractor shall promptly remove any such material or debris.

The Contractor shall comply with all Federal, State, and local regulations regarding the collection, storage, and disposal of solid, sanitary, septic, or hazardous waste materials.

Other Permits

No other discharge permits exist for this site.

III. Maintenance

Describe procedures to ensure the timely maintenance of vegetation, control measures, and other protective measures identified in the site plan.

The Contractor shall protect erosion and sediment control devices from damage and shall repair and replace dikes, erosion checks, sediment traps, silt fences, and overflow outlets when damaged by construction, natural, and other physical causes. All soil erosion and sediment control devices shall function as originally intended.

Where applicable, the Contractor shall maintain sod by watering, fertilizing, weeding, mowing, and trimming and shall replace sod which has been eroded, damaged by construction activities, deteriorated, or diseased.

All stock piled soil shall be surrounded by a straw bale dike, silt fence, or equivalent to properly control sediment runoff. While stockpiles are not directly addressed in the contract documents, this preventative measure is a requirement to comply with this plan.

Temporary seeding, permanent seeding, mulching or sod stabilization procedures, or their equivalent, must be initiated on all disturbed areas within fourteen (14) calendar days of last activity in that area.

Stabilized Construction Entrances may be top-dressed with additional stone as necessary to maintain their effectiveness. The Contractor will at all times take such measures as required to minimize off-site tracking of sediments and debris. Where offsite tracking does occur, the Contractor shall promptly remove any such material or debris.

Accumulated sediment shall be removed and disposed of as required to keep the control measure functional. Excess accumulation of sediment at erosion control devices will not be permitted.

Inspection services provided by the owner or owner's representatives do not relieve the Contractor's responsibility for inspection and maintenance of the erosion control measures or his duty to comply with this plan and the conditions of the NPDES General Permit.

IV. Inspections

The site will be inspected by a qualified representative of the Contractor and Owner at least once every seven calendar days and within 24 hours of the end of a rainfall event of 0.5 inches or greater. Where sites have been finally stabilized, inspection will be conducted at least once every month until a Notice of Termination (NOT) is filed for this project.

For this project, the Engineer is not providing inspection services.

The inspections shall be for evidence of or the potential for pollutants entering the drainage system. In particular, inspection should be made of disturbed areas, storage areas, discharge locations, erosion and sediment control measures, and points of entrance and exit to the site. The inspector shall indicate in his report if rainfall has occurred since the last inspection. When possible, the date and volume of rainfall should also be recorded.

A written inspection report will be kept and filed with this plan. Any modifications or revisions to the plan based on results of the inspections shall be made for timely implementation of any changes within seven days of the inspection. Reports shall identify any incidents of non-compliance with the SWPPP and the General Permit and actions taken to ensure compliance.

Inspection services provided by the owner or owner's representatives do not relieve the Contractor's responsibility for inspection and maintenance of the erosion control measures or his duty to comply with this plan and the conditions of the General Permit.

V. Non-Storm Water Discharges

Sources of non-storm water discharges, except from fire-fighting activities, shall be included along with appropriate pollution prevention measures for these flows.

There are no anticipated non-storm water discharges from this site.

VI. Notice Of Intent (NOI)

For this project, the Owner and Contractor will each file a Notice Of Intent (NOI) with the EPA. Copies of the NOI's should also be forwarded to the Town of Addison.

Under no circumstances will any construction activities identified as potential pollutant sources commence on this contract until 48 hours after submittal of the NOI.

A copy of each NOI submitted for this project will be posted at the construction site in a prominent place for public viewing. (See section X.)

Copies are also included in the Appendix of this document.

VII. Certification of Contractors

Identify, for each measure identified in the plan, the contractor(s) and/or sub-contractor(s) that will implement the measure. All contractor(s) and sub-contractor(s) must sign a copy of the certification statement (example attached) and those certifications will be included in this plan. Also include copies of any NOI's filed in association with this project.

The General contractor shall provide the Owner with a list of their subcontractors. This list shall also identify the responsibilities of the subcontractor with regard to the implementation of and compliance with this plan and the NPDES Storm Water Discharge Permit. This list shall be kept in the Appendix.

Each contractor and subcontractor performing work which will have an impact on the pollution potential of this project shall be identified herein. Subcontractor information will be provided by the general contractor.

It is the responsibility of the General Contractor to obtain certification forms from his subcontractors prior to any work being performed by said subcontractor on this project. A brief description of the work to be performed will be included with the certification. Certification by the subcontractors does not relieve the Contractor's responsibility for inspection and maintenance of the erosion control measures or his duty to comply with this plan and the conditions of the General Permit. The signed certification forms will be submitted to the owner and will be included as part of this plan (File in the Appendix).

An example certification form is given in the Appendix. Copies of this form may be used.

VIII. Notice of Termination

A Notice Of Termination (NOT) may be filed for each co-permittee after the portion of work for which said co-permittee is responsible is finally stabilized and accepted by Town of Addison (owner). The Contractor shall not file an NOT without the prior approval and acceptance of the work by the owner. A copy of any NOT's filed in association with this project shall be submitted to the owner and filed with this plan.

IX. Maintenance of Records

This plan and the records required herein will be kept by the permittee(s) for a minimum period of three (3) years following the date of final stabilization in accordance with the requirements of the General Permit.

X. Posting of permit documents

A copy of any Notice Of Intent (NOI) forms submitted for this project will be posted, along with a project description, in accordance with the NPDES General Permit requirements and regulations. Posting can be on the job-site bulletin board or work trailer. Copies of these forms are also contained in this document.

XI. Plan Revisions/Modifications

This plan shall be amended by the Contractor whenever there is a change in design, construction, operation, or maintenance, which has a significant effect on the potential for the discharge of pollutants to the waters of the United States and which has not otherwise been addressed in the plan or if the plan proves to be ineffective in eliminating or significantly minimizing pollutants or in otherwise achieving the general objectives of controlling pollutants in storm water discharges from the site.

A record shall be kept of any revisions/modifications identifying the reason for the change, the date made, the date implemented, and the section revised. This record will be filed in the Appendix of this document.

GLOSSARY:

NOTE: This glossary is to assist in defining the terms and practices used in this plan. Should contract documents conflict with the minimum requirements of the EPA General Permit, the more stringent of the two shall apply.

Erosion and Sediment Controls:

Structural controls include silt fences, earth dikes, drainage swales, sediment traps, check dams, subsurface drains, pipe slope drains, level spreaders, storm drain inlet protection, rock outlet protection, reinforced soil retaining systems, gabions, and temporary or permanent sediment basins.

Non-structural controls include waste disposal, control of off-site vehicle tracking, and compliance with State and/or local solid, sanitary or septic waste disposal regulations.

For common drainage areas > 10 disturbed acres, a sediment basin with a volume of 3,600 cubic feet per acre drained, or equivalent control measures, shall be provided until final stabilization of the site. Where a basin is not attainable, smaller basins and/or sediment traps should be used.

At a minimum, silt fences or equivalent sediment controls are required for all sideslope and downslope boundaries of the construction area.

These minimum controls shall also apply to drainage locations serving < 10 acres unless a sediment basin with a storage volume of 3,600 cubic feet per acre drained is provided.

Stabilization Measures:

Stabilization practices may include temporary seeding, permanent seeding, mulching, geotextiles, sod stabilization, vegetative buffer strips, protection of trees, preservation of mature vegetation, and other appropriate measures.

Stabilization measures will be initiated as soon as practicable where construction activities have temporarily or permanently ceased. The measures will be initiated no more than 14 days after activity has temporarily or permanently ceased except where construction activity will resume on that portion of the site within 21 days or initiation of stabilization measures is precluded by snow or seasonal arid conditions. Arid conditions may occur in areas where the average rainfall is less than 20 inches.

Storm Water Management:

Practices include wet ponds, retention structures, flow attenuation using vegetated swales and natural depressions, infiltration and sequential systems using one or more of these practices.

APPENDIX

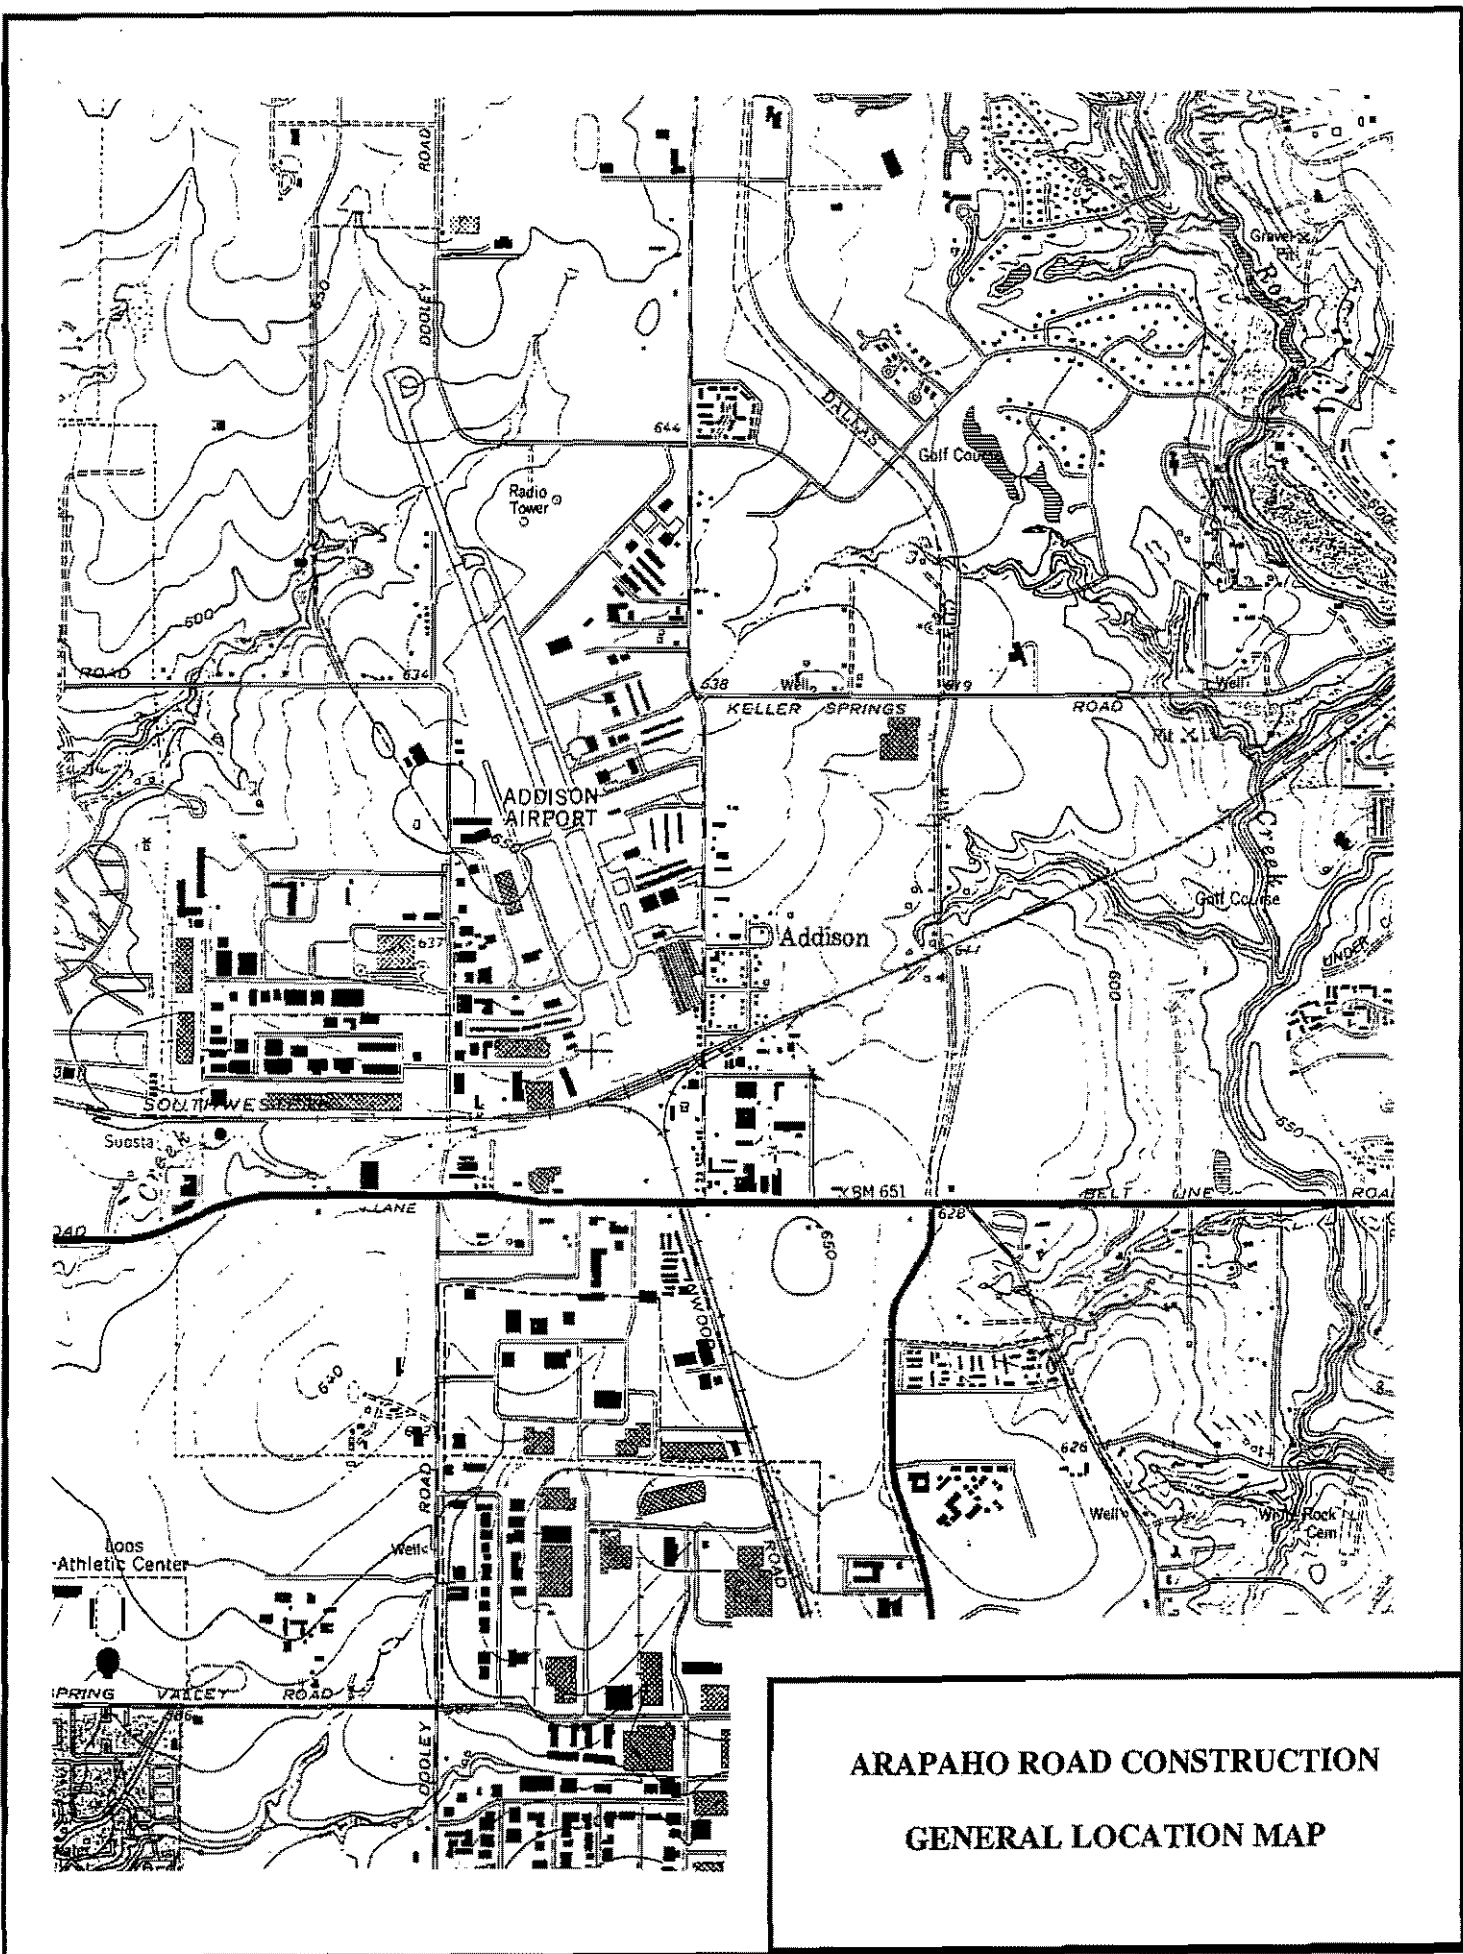

This appendix contains:

- Site Maps
- Erosion & Sediment Control Plan & Details
- Inspection Forms & Reports
- Notice Of Intent Forms (Copies)
- Certification of Contractors
- Notice of Termination Forms (Copies)
- Record of major soil disturbing activities
- Record of Revisions/Modifications

ARAPAHO ROAD CONSTRUCTION

USGS Topographic Map - 7.5 Minute Series
Addison Quadrangle

NPDES FORM

United States Environmental Protection Agency Washington, DC 20460

Notice of Intent (NOI) for Storm Water Discharges Associated with Industrial Activity Under a NPDES Permit

Submission of this Notice of Intent constitutes notice that the party identified in Section II of this form intends to be authorized by a NPDES permit issued for storm water discharges associated with industrial activity in the State identified in Section III of this form. Becoming a permittee obligates such discharger to comply with the terms and conditions of the permit. ALL NECESSARY INFORMATION MUST BE PROVIDED ON THIS FORM.

I. Permit Selection: You must indicate the NPDES Storm Water general permit under which you are applying for coverage. Check one of these.

Baseline Industrial

Baseline Construction

Multi-Sector (Group Permit)

II. Facility Operator Information

Name: ED BELL, CONSTRUCTION Phone: 214 / 358-6581

Address: 10605 HARRY HINES BOULEVARD Status of Owner/Operator: P

City: DALLAS State: TX ZIP Code: 75354

III. Facility/Site Location Information

Name: ARAPAHO ROAD CONSTRUCTION

Is the facility located on Indian Lands? (Y or N)

Address:

City: ADDISON State: TX ZIP Code: 75001

Latitude: 325730 Longitude: 964930 Quarter: Section: Township: Range:

IV. Site Activity Information

MS4 Operator Name: TOWN OF ADDISON

Receiving Water Body: WHITE ROCK CREEK

If you are filing as a co-permittee, enter storm water general permit number:

SIC or Designated Activity Code: Primary: CD 2nd:

Is the facility required to submit monitoring data? (1, 2, 3, or 4) 1

If You Have Another Existing NPDES Permit, Enter Permit Number:

Multi-Sector Permit Applicants Only:

Based on the instructions provided in Addendum H of the Multi-Sector permit, are species identified in Addendum H in proximity to the storm water discharges to be covered under this permit, or the areas of BMP construction to control those storm water discharges? (Y or N)

Will construction (land disturbing activities) be conducted for storm water controls? (Y or N)

Is applicant subject to and in compliance with a written historic preservation agreement? (Y or N)

V. Additional Information Required for Construction Activities Only

Project Start Date: Completion Date:

Estimated Area to be Disturbed (in Acres): 1.4

Is the Storm Water Pollution Prevention Plan in compliance with State and/or Local sediment and erosion plans? (Y or N) Y

VI. Certification: The certification statement in Box 1 applies to all applicants. The certification statement in Box 2 applies only to facilities applying for the Multi-Sector storm water general permit.

BOX 1 ALL APPLICANTS I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

BOX 2 MULTI-SECTOR STORM WATER GENERAL PERMIT APPLICANTS ONLY: I certify under penalty of law that I have read and understand Part I.B. eligibility requirements for coverage under the Multi-Sector storm water general permit, including those requirements relating to the protection of species identified in Addendum H. To the best of my knowledge, the discharges covered under this permit, and construction of BMPs to control storm water run-off, are not likely to and will not likely adversely affect any species identified in Addendum H of the Multi-Sector storm water general permit or are otherwise eligible for coverage due to previous authorization under the Endangered Species Act. To the best of my knowledge, I further certify that such discharges, and construction of BMPs to control storm water run-off, do not have an effect on properties listed or eligible for listing on the National Register of Historic Places under the National Historic Preservation Act, or are otherwise eligible for coverage due to a previous agreement under the National Historic Preservation Act. I understand that continued coverage under the Multi-Sector general permit is contingent upon maintaining eligibility as provided for in Part I.B.

Date:

Signature:

Instructions - EPA Form 3510-6
Notice Of Intent (NOI) For Storm Water Discharges Associated With Industrial Activity
To Be Covered Under a NPDES General Permit

Who Must File A Notice Of Intent (NOI) Form

Federal law at 40 CFR Part 122 prohibits point source discharges of storm water associated with industrial activity to a water body(ies) of the U.S. without a National Pollutant Discharge Elimination System (NPDES) permit. The operator of an industrial activity that has such a storm water discharge must submit a NOI to obtain coverage under a NPDES Storm Water General Permit. If you have questions about whether you need a permit under the NPDES Storm Water program, or if you need information as to whether a particular program is administered by EPA or a state agency, telephone or write to the Notice of Intent Processing Center at (703) 931-3230.

Where To File NOI Form

NOIs must be sent to the following address:

Storm Water Notice of Intent (4203)
401 M Street, S.W.
Washington, DC 20460

Completing The Form

You must type or print, using upper-case letters, in the appropriate areas only. Please place each character between the marks. Abbreviate if necessary to stay within the number of characters allowed for each item. Use one space for breaks between words, but not for punctuation marks unless they are needed to clarify your responses. If you have any questions on this form, call the Notice of Intent Processing Center at (703) 931-3230.

Section I Permit Selection

You must indicate the NPDES storm water general permit under which you are applying for coverage. Check one box only. The Baseline Industrial and Baseline Construction permits were issued in September 1992. The Multi-Sector Permit became effective October 1, 1995.

Section II Facility Operator Information

Provide the legal name of the person, firm, public organization, or any other entity that operates the facility or site described in this application. The name of the operator may or may not be the same as the name of the facility. The responsible party is the legal entity that controls the facility's operation, rather than the plant or site manager. Do not use a colloquial name. Enter the complete address and telephone number of the operator.

Enter the appropriate letter to indicate the legal status of the operator of the facility: F = Federal; S = State; M = Public (other than federal or state); P = Private

Section III Facility/Site Location Information

Enter the facility's or site's official or legal name and complete street address, including city, state, and ZIP code. Do not provide a P.O. Box number as the street address. If applying for a Baseline Permit and the facility or site lacks a street address, indicate the state and either the latitude and longitude of the facility to the nearest 15 seconds or the quarter, section, township, and range (to the nearest quarter section) of the approximate center of the site. If applying for the Multi-Sector Permit indicate the complete street address and either the latitude and longitude of the facility to the nearest 15 seconds or the quarter, section, township, and range (to the nearest quarter section) of the approximate center of the site.

All applicants must indicate whether the facility is located on Indian lands.

Section IV Site Activity Information

If the storm water discharges to a municipal separate storm sewer system (MS4), enter the name of the operator of the MS4 (e.g., municipality name, county name) and the receiving water of the discharge from the MS4. (A MS4 is defined as a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) that is owned or operated by a state, city, town, borough, county, parish, district, association, or other public body which is designed or used for collecting or conveying storm water.)

If the facility discharges storm water directly to receiving water(s), enter the name of the receiving water(s).

If you are filing as a co-permittee and a storm water general permit number has been issued, enter the number in the place provided.

Indicate the monitoring status of the facility. Refer to the permit for information on monitoring requirements. Indicate the monitoring status by entering one of the following:

- 1 = Not subject to monitoring requirements under the conditions of the permit.
- 2 = Subject to monitoring requirements and required to submit data.
- 3 = Subject to monitoring requirements but not required to submit data.
- 4 = Subject to monitoring requirements but submitting certification for monitoring exclusion.

List, in descending order of significance, up to two 4-digit standard industrial classification (SIC) codes that best describe the principal products or services provided at the facility or site identified in Section III of this application. If you are applying for coverage under the construction general permit, enter "CO" (which represents SIC codes 1500-1799).

For industrial activities defined in 40 CFR 122.26(b)(14)(i)-(xi) that do not have SIC codes that accurately describe the principal products produced or services provided, use the following 2-character codes.

- HZ = Hazardous waste treatment, storage, or disposal facilities, including those that are operating under interim status or a permit under subtitle C of RCRA [40 CFR 122.26(b)(14)(iv)];
- LF = Landfills, land application sites, and open dumps that receive or have received any industrial wastes, including those that are subject to regulation under subtitle D of RCRA [40 CFR 122.26(b)(14)(v)];
- SE = Steam electric power generating facilities, including coal handling sites [40 CFR 122.26(b)(14)(vi)];
- TW = Treatment works treating domestic sewage or any other sewage sludge or wastewater treatment device or system, used in the storage, treatment, recycling, and reclamation of municipal or domestic sewage [40 CFR 122.26(b)(ix)]; or
- CO = Construction activities [40 CFR 122.26(b)(14)(x)].

If there is another NPDES permit presently issued for the facility or site listed in Section III, enter the permit number. If an application for the facility has been submitted but no permit number has been assigned, enter the application number.

Facilities applying for coverage under the Multi-Sector storm water general permit must answer the last three questions in Section IV. Refer to Addendum H of the Multi-Sector general permit for a list of species that are either proposed or listed as threatened or endangered. "BMP" means "Best Management Practices" that are used to control storm water discharges.

Indicate whether any construction will be conducted to install or develop storm water runoff controls.

Section V Additional Information Required for Construction Activities Only

Construction activities must complete Section V in addition to Sections I through IV. Only construction activities need to complete Section V.

Enter the project start date and the estimated completion date for the entire development plan.

Provide an estimate of the total number of acres of the site on which soil will be disturbed (round to the nearest acre).

Indicate whether the storm water pollution prevention plan for the site is in compliance with approved state and/or local sediment and erosion plans, permits, or storm water management plans.

Section VI Certification

Federal statutes provide for severe penalties for submitting false information on this application form. Federal regulations require this application to be signed as follows:

For a corporation: by a responsible corporate officer, which means: (i) president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

For a partnership or sole proprietorship: by a general partner or the proprietor; or

For a municipality, state, Federal, or other public facility: by either a principal executive officer or ranking elected official.

Paperwork Reduction Act Notice

Public reporting burden for this application is estimated to average 0.5 hours per application, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates, any other aspect of the collection of information, or suggestions for improving this form, including any suggestions which may increase or reduce this burden to: Chief, Information Policy Branch, 2136, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, or Director, Office of Information and Regulator Affairs, Office of Management and Budget, Washington, DC 20503.

Re; Arapaho Road Storm Water Pollution Prevention

Dear Mr. Weber:

This is to call your attention to the need to implement the Storm Water Pollution Prevention Plan (SWPPP).

Huitt Zollars letter of May 21, 1998 outlined the items that needed to be completed administratively. Our NOI has been forwarded to you via Nelson Mitchell.

Please give this matter your prompt attention.

Very truly yours,

Town of Addison

James C. Pierce, Jr., P.E., DEE
Assistant City Engineer

RE: Storm Water Pollution Prevention Plan
Arapaho Road Construction - Addison, TX
Huitt-Zollars Project No. 01-1772-01

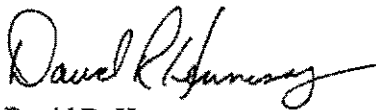

Please find attached three (3) copies of the referenced plan. The following items should be completed to implement the Storm Water Pollution Prevention Plan prior to beginning construction:

- Sign the plan in accordance with permit requirements. (The same person who signed the Notice of Intent should sign the plan.) The Town of Addison will submit an NOI as co-permittee.
- A copy of each Notice of Intent (NOI) should be inserted in the Appendix of the plan.
- A copy of each Notice of Intent (NOI) should be posted on the job site (as stated in part X of the plan).
- All contractors must submit a certification to the Owner prior to construction. (See Part VII of the plan.) Blank forms are provided in the Appendix.
- Inspections must be performed as outlined in Part IV of the plan. Inspection forms are provided in the Appendix.
- A record should be kept of major soil disturbing activities. Forms are provided in the Appendix of the plan.

Please note that issuance of the new NPDES general permit for construction for EPA Region 6 (currently pending) will require that you re-apply for the permit. I have also attached a brief summary of steps to be taken for compliance with the NPDES requirements for construction projects.

Sincerely,

HUITT-ZOLLARS, INC.

This post card is being sent to you because you either currently have coverage or had coverage under the NPDES 1992 Baseline Industrial Storm Water General Permit ("Baseline Permit"). EPA Region 6 issued the final NPDES Modification of the Multi-Sector General Permit ("MSGP") and Notification of Termination of the Baseline Permit [63 Fed. Reg. 52429-52577] on September 30, 1998. The Baseline Permit will be terminated on December 31, 1998. Facilities with administratively continued coverage under the Baseline Permit must re-apply for NPDES permit coverage. Eligible facilities may transition to the existing MSGP by filing a Notice of Intent (NOI) for that permit by December 29, 1998. These facilities should submit an NOI application form (EPA Form 3510-6) to obtain coverage under the MSGP. The permit language, the NOI and the Modification are all available on the Region 6 Storm Water web page at <http://www.epa.gov/region6/stw/> or you may request a copy to be mailed to you by phoning (202)260-7786. You may request NOIs by phoning (214)665-7190.

If you have already obtained coverage under the Multi-Sector General Permit, you do not need to reapply for permit coverage. The MSGP is similar to the Baseline Permit in that both permits require a SWPPP. Differences between the two permits are given in Appendix B of the Modifications starting on page 52467. You will need to review the MSGP and the Modifications, and update your SWPPP accordingly. The deadline for updating and implementing the SWPPP is March 29, 1999.

Failure to apply will result in your facility being unpermitted and in violation of Section 301 of the Clean Water Act effective on midnight of December 31, 1998. Your cooperation with this NPDES program will help assure that the goals of the Clean Water Act are achieved and that all waters of the United States are fishable and swimmable. If you have any questions, you may phone the Storm Water Hotline at (800)245-6510, the Region 6 Water Quality Protection Division at (214)665-7190, or the Region 6 Compliance Assurance and Enforcement Division at (214)665-7112.

NPDES
FORM

United States Environmental Protection Agency
Washington, DC 20460

Notice of Intent (NOI) for Storm Water Discharges Associated with Industrial Activity Under a NPDES Permit

Submission of this Notice of Intent constitutes notice that the party identified in Section II of this form intends to be authorized by a NPDES permit issued for storm water discharges associated with industrial activity in the State identified in Section III of this form. Becoming a permittee obligates such discharger to comply with the terms and conditions of the permit. ALL NECESSARY INFORMATION MUST BE PROVIDED ON THIS FORM.

I. Permit Selection: You must indicate the NPDES Storm Water general permit under which you are applying for coverage. Check one of these.

Baseline Industrial

Baseline Construction

Multi-Sector (Group Permit)

II. Facility Operator Information

Name: Town of Addison Phone: 972 450 2879

Address: PO BOX 9010 Status of Owner/Operator: M

City: Addison State: TX ZIP Code: 75001-9010

III. Facility/Site Location Information

Name: ARAPAHO ROAD CONSTRUCTION Is the facility located on Indian Lands? (Y or N) N

Address: ARAPAHO ROAD

City: Addison State: TX ZIP Code: 75248

Latitude: 32|57|30 Longitude: 96|49|30 Quarter: Section: Township: Range:

IV. Site Activity Information

MS4 Operator Name: TOWN OF Addison

Receiving Water Body: White Rock Creek

If you are filing as a co-permittee, enter storm water general permit number:

SIC or Designated Activity Code: Primary: 2nd:

Is the facility required to submit monitoring data? (1, 2, 3, or 4) 1

If You Have Another Existing NPDES Permit, Enter Permit Number:

filed on wrong form

V. Additional Information Required for Construction Activities Only

Project Start Date: 05|01|98 Completion Date: 06|30|99 Estimated Area to be Disturbed (in Acres):

VI. Certification: The certification statement in Box 1 applies to all applicants. The certification statement in Box 2 applies only to facilities apply

BOX 1 ALL APPLICANTS
I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

BOX 2 MULTI-SECTOR STORM WATER GENERAL PERMIT APPLICANTS ONLY:
I certify under penalty of law that I have read and understand Part I.B. eligibility requirements for coverage under the Multi-Sector storm water general permit, including those requirements relating to the protection of species identified in Addendum H.
To the best of my knowledge, the discharges covered under this permit, and construction of BMPs to control storm water run-off, are not likely to and will not likely adversely affect any species identified in Addendum H of the Multi-Sector storm water general permit or are otherwise eligible for coverage due to previous authorization under the Endangered Species Act.
To the best of my knowledge, I further certify that such discharges, and construction of BMPs to control storm water run-off, do not have an effect on properties listed or eligible for listing on the National Register of Historic Places under the National Historic Preservation Act, or are otherwise eligible for coverage due to a previous agreement under the National Historic Preservation Act.
I understand that continued coverage under the Multi-Sector general permit is contingent upon maintaining eligibility as provided for in Part I.B.

RE: Storm Water Pollution Prevention Plan
Arapaho Road Construction - Addison, TX
Huitt-Zollars Project No. 01-1772-01

Please find attached three (3) copies of the referenced plan. The following items should be completed to implement the Storm Water Pollution Prevention Plan prior to beginning construction:

- Sign the plan in accordance with permit requirements. (The same person who signed the Notice of Intent should sign the plan.) The Town of Addison will submit an NOI as co-permittee.
- A copy of each Notice of Intent (NOI) should be inserted in the Appendix of the plan.
- A copy of each Notice of Intent (NOI) should be posted on the job site (as stated in part X of the plan).
- All contractors must submit a certification to the Owner prior to construction. (See Part VII of the plan.) Blank forms are provided in the Appendix.
- Inspections must be performed as outlined in Part IV of the plan. Inspection forms are provided in the Appendix.
- A record should be kept of major soil disturbing activities. Forms are provided in the Appendix of the plan.

Please note that issuance of the new NPDES general permit for construction for EPA Region 6 (currently pending) will require that you re-apply for the permit. I have also attached a brief summary of steps to be taken for compliance with the NPDES requirements for construction projects.

Sincerely,

HUITT-ZOLLARS, INC.
